Focus areas

State-of-the-art solutions for dairy processing, packaging,
distribution, products and dairy farming

 koelnmesse

India's leading trade fair on Dairy and Dairy technology

Koelnmesse India is pleased to announce a special edition of India's leading trade fair on dairy & dairy technology - IIDE from 13-15 April 2022 at Bombay Exhibition Centre (NESCO), Mumbai in association with the Indian Dairy Association (IDA). Despite Covid-19 challenges, the dairy sector in India continues to be positive on the back of government support, increasing population & per capita consumption. After a brief hiatus of two years, network with senior professionals and generate unlimited business opportunities in a safe business environment. At IIDE 2022, connect with the right buyers and learn key industry trends while staying ahead of your competition! Be there where decisions are made.

ABOUT IDA : Established in 1948, Indian Dairy Association (IDA) is the apex body of the dairy industry in India. The members are from the cooperatives, MNCs, corporate bodies, private institutions, educational institutions, government and public sector units. IDA functions very closely with the dairy producers, professionals & planners, scientists & educationists, institutions and organisations associated with the development of dairying in India. Website: <http://indairyasso.org/>

IIDE 2022

India's leading trade fair on
dairy and dairy technology

In association with

**Milind Dixit**

Managing Director
Koelnmesse YA Tradefair Pvt. Ltd.

Dear exhibitors, visitors and delegates,

Koelnmesse India is pleased to announce a special edition of India's leading trade fair on dairy and dairy technology – India International Dairy Expo (IIDE) to be held from 13-15 April 2022 at Bombay Exhibition Centre (NESCO), Mumbai in association with the Indian Dairy Association (IDA). India's biggest & most important dairy technology exhibition is back after a gap of 3 years. The rationale for organizing the India International Dairy Expo (IIDE) is to provide an extensive platform to all dairy and dairy technology professionals from farmers to cooperative milk producers and also organised dairy players with large production units and advanced companies in milk processing across the length and breadth of India.

Indian Dairy Association (IDA), West Zone is hosting a technical seminar with the theme - Ideate. Innovate. Succeed on the first day of the India International Dairy Show (IIDE) on 13 April 2022. Panel discussions and sessions of this technical seminar will be addressed by top dairy and dairy technology professionals and will be attended by notable names in the entire dairy fraternity. This Seminar will offer an opportunity for all dairy professionals to get

acquainted with the latest ideas and innovations in milk processing, packaging, distribution, milk products, animal breeding, and nutrition.

We are pleased to announce the launch of the IIDE Knowledge Forum in association with the Centre for Advancement of Small and Medium Businesses (CASMB) and the Association of Food Scientists and Technocrats (AFSTI), Mumbai Chapter. Under this initiative this year we are announcing "Open Floor Workshops" which will be an exclusive knowledge offering to the stakeholders in the dairy fraternity.

We have received an encouraging response for the special edition of IIDE 2022 with over 150 exhibitors coming from 10 countries including the top brands in the dairy sector presenting the best technology solutions. The range of exhibitors on the show floor is offering complete solutions to the dairy industry from processing, packaging, filling technology, pouch packaging, milk analysers, and dairy ingredients. Top buyers and VIPs from leading companies and dairy cooperatives have confirmed their presence to grace the show.

We welcome all stakeholders in the dairy industry for the special edition of IIDE 2022 on the show floor.

Arun Patil
Chairman
Indian Dairy Association (West Zone)
Mumbai

I am delighted to share a preview of the upcoming India International Dairy Expo scheduled from 13th to 15th April 2022 at Bombay Exhibition Centre, Mumbai.

The Indian dairy industry has achieved great success in milk production, processing, value added milk products, distribution, marketing and exports of milk products during the last five decades. However, to remain Self Sufficient – 'Atmanirbhar', as well as to retain leadership in future, India will have to continuously explore new ideas and focus on innovations in the various streams of dairy industry, viz. animal productivity, disease control, product safety & quality assurance, digitalization & exports.

As an industry focussed event, IIDE 2022 shall provide an ideal business platform to the equipment manufacturers & service providers to the key decision makers from the dairy industry.

Concurrent to IIDE 2022, IDA (West Zone) is also organizing a National Seminar with the theme 'Ideate. Innovate. Succeed.' At the seminar deliberations will take place on new technologies & innovations like digitalization, blockchain technology & drones.

The entire dairy fraternity is invited to witness the latest developments in the dairy industry, engage in discussions with experts, seek solutions for their challenges and network with those who of the Indian Dairy Industry.

We eagerly look forward to meeting you at India International Dairy Expo, 'IIDE 2022' and National Seminar, 'Ideate. Innovate. Succeed' !

Christakis Agathangelou Ltd.

Hall 1/A 201

Agathangelou is a highly specialized engineering firm, with more than 60 years' accumulated experience providing services in the design and manufacture of equipment for the following products:

HALLOUMI & GRILLED CHEESE LINES

Our company has the longest-standing experience in Halloumi and Grilled Cheese equipment production worldwide.

PANEER LINES

Our production lines offer reduced handling and improved yield due to reduced human involvement and more standardized production. We have developed a range of Automatic and Semi-Automatic lines.

Our expertise also covers production lines for whey cheeses, Greek yogurt, feta, and similar products.

More information can be retrieved at

www.agathangelou.com

Ameya Food Chem Plast Systems Pvt. Ltd.

Hall 1/E 55

Representing Globally Leading Companies in India for sales & servicing of their Equipment & Technologies for 20++ years such as Waukesha Cherry Burrell brand (SPX) in India for PD pumps, Scraped

Surface Heat Exchangers, Valves & Centrifugal pumps. Now having extended portfolios of SPX products Lightnin mixers, Bran & Lubbe metering pumps & APV/Gaulin Homogenizers. For dairy processing, our focused offerings are ECP lobe pumps, Twin Screw pumps, centrifugal pumps, SSHEs & single seat as well mix proof valves (in PMO certified as well as High flow versions) as well as mixers. We have numerous references for handling milk, Cheese, Cream & other dairy constituents'

Anval Valves Pvt. Ltd.

Hall 1/C 58

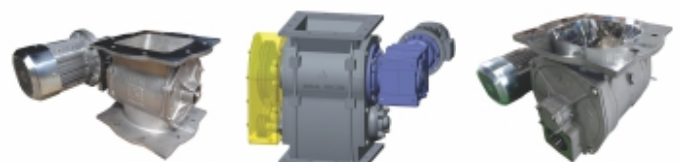

Anval is a designer, manufacturer

er and supplier of feeders and airlocks to powder and bulk materials handling industries. Our valves are available in a wide range of sizes, materials and configurations so that a solution for practically any application is available. Anval produces heavy-duty industrial valves capable of withstanding the toughest in-service conditions. The simplicity of the Anval designs means a relatively low maintenance requirement even under harsh operating conditions. Our products and solutions have proven themselves across a wide range of industries and in some of the most demanding manufacturing environments. The entire valve range can be customized for your specific applications. The valve range can be made of any material requirements and any size. Spare parts and support are available and Anval can offer a full overhaul service.

• Air-lock or Rotary Valves - Heavy-Duty Rotary valves Airlocks & Feeders for challenging

applications can serve an extensive range from heavy minerals industries to light dust.

- Rotary Floating Shoe Valves - Rotary Floating Shoe Airlocks and Feeder valves for High Wear, High Temperature and High-Pressure Applications which provides unmatched performance.
- Dump or Flap Valves - Dump valves or flap best are the best companions for Air Locking & Feeding in Vacuum or Pressure conditions when Dealing With Irregular Shapes
- Rotary Easy Clean Valves - Tool-Less Quick & Easy Clean Rotary Valves airlock for dairy applications where frequent & quick cleaning of valve internals is necessary
- Self Cleaning Rotary Valve - Self-cleaning dual rotary Valves to handle and convey Sticky, Viscous, Slow or Non-free flowing bulk solids.
- Rotary feeders - The Toughest Corrosion Resistant Hygienic Rotary Valve for Food, Pharmaceuticals and Chemical Applications.

Airlock India Pvt. Ltd.

Hall 1/D 27

Airlock India is a solution provider for Bulk Solids

Handling, supplies a

range of Pneumatic Conveying Components of high quality to various industries of FOOD, DAIRY, PHARMA, CHEMICAL, SUGAR and MINERALS.

Manufacturer of USDA/EHEDG/ATEX approved Rotary/Diverter/By-Pass/Scale & Relief Valves at Coimbatore, TN

Exports Valves to ASEAN and European countries.

Authorized Distributor for BFM Fitting, SOLIMAR Silo Fluidizer, JACOB Piping Component, ECLIPSE Magnetic Separator, MORRIS Coupling/Bends and STERIVALVES

Offers After-Market Services for Servicing of own and reputed 3rd party Valves/Blowers including supplying of Spares and contracting AMC Manages Sales/Service from 9 strategic locations in India

Azelis India Pvt.Ltd.

Hall 1/A 207

Your partner in Food & Health innovation Healthier, safer and tastier food made with responsible, honest

ingredients shape consumer demands today. Azelis is a leader in supplying food manufacturers around the world with high quality ingredients, effective auxiliary materials, and a wide range of additives to help create the nutrition profile, taste, texture, performance and appearance you need for your recipes.

Your success and satisfaction means everything. So we've built a specialist team and dedicated application labs to support your goals by delivering outstanding technical skills, formulation expertise and regulatory advice. In India, we partner with leading ingredient manufacturers, including DSM, CP Kelco, Corbion, KMC, Ingredia, Symrise, King Prebiotics, C&P, AVT Natural, S4S, Synergy, BioNeutra, PQ Corporate, Galam, Fina to deliver you the best of nature and science.

From concept to launch, Azelis is here to help.

BUCHI India Pvt. Ltd.

Hall 1/A 24

For more than 80 years BUCHI is a leading solution

provider in laboratory

technology for R & D, quality control and production worldwide. We serve a wide range of market segments such as pharmaceuticals, chemicals, food & beverage, feed, environmental analysis and academia.

Our solutions for laboratory, industrial and parallel evaporation, spray drying, melting point, preparative chromatography, extraction, distillation & digestion and near infrared spectroscopy meet the highest needs of our demanding customers around the globe.

Connell Bros Company (I) Pvt. Ltd.

Hall 1/A 09

Connell Bros Company India Pvt Ltd

is one of the largest International Marketers & Distributors of Specialty Ingredients in the Pacific Rim with more than 100 years of experience.

We offer various ingredients like Soy Proteins, Pea Proteins, Dairy & Vegan Cultures, Actives for Immunity, Vitamins, Soluble & Insoluble Fibers, Pectin, Smoke Flavours, Natural & Nature Identical Flavours, Hydrocolloids, Natural Spice & Herb Extracts, Natural Colours, Edible Glitters for Dairy, Bakery, Confectionary, Seasoning, Snacks, Nutrition, Plant-based, Meat & Mock Meat Industries.

We serve to Dairy & Plant based companies with Plant-based solutions as well.

We represent Sacco for their Dairy & Vegan cultures, IFF for their Proteins& Fibers, BASF for their Actives, Red Arrow for Smoke Flavours, Kalsec for Natural Colours and Spice Blends and many more Fortune 500 Companies.

Connell's principals are top of the line global specialty chemical & food ingredients manufacturers and premium product quality assured by these companies are brought to the customer through Connell.

REVOLUTIONISING INDIA'S DAIRY-TECH LANDSCAPE SINCE 1995.

Prompt is an indigenous and a leading dairy-tech brand that provides solutions to digitise the milk procurement supply chain. Our Cloud, IoT, BI-enabled products and solutions facilitate transparency and traceability throughout the dairy supply chain in real-time and ensure fair payment to the farmers.

Present across 28+ states

Present across 270+ districts

Control Print Ltd.

Hall 1/D 37

Control Print Limited (CPL) is India's OWN Coding Equipment Manufacturer, with

manufacturing facilities in Nalagarh, Guwahati & Vasai and a comprehensive support network across India we are India's leading online Coding Solution provider to provide the best engineered and most effective solution across all verticals. Our close to two decades of experience in the Coding & Marking Industry, Control Print has developed a philosophy that consists of partnering with the leading global players technologically. We utilize our unsurpassed local manufacturing infrastructure and highly motivated skilled workforce to provide the best engineered and most cost effective products and solutions for the entire range of manufacturing industries which include Automotive, Agro-Chemicals, Metals, FMCG, Pharmaceutical, Food & Beverage, Wire, Cable, & Pipe, Construction Materials, and Commercial Printing. Enabling our customers in production line reliability, flexibility, cost efficiencies, or other myriad ways, Control Print's solutions can impact directly or subtly, but always leaving a mark of excellence in their wake.

Creative Valve Manufacturing Company

Hall 1/B 48

Creative Valve Manufacturing Company is a specialized Valve Manufacturer integrating design development of different types of Dairy & Pharma Valves & Fittings. Since founded in the year 2004. Our products cover a wide range of varieties of Industrial Valves, Dairy Fittings, Butt Weld Fittings, Compressor Ferrule Fittings and Investment Casting Fittings. With decades of experience, we have made a reliable position across India as a leading Manufacturer & Exporter of distinctive Industrial Valves & Fittings products.

Our products widely used & supply across India in the Industries of Food & Breweries, Sugar, Pharmaceuticals, Fertilizers, Chemicals, Petroleum, Textile, Water, Thermal Power Plant & Nuclear etc Also we import our products from the countries and regions of Domestic & International etc.

We are highly recognized by users for dependable quality & reasonable price. Guided by the quality policy of "Advance Technology, Rigorous Scientific Management, Excellent Quality and prestigious brand". CVM continuously offer new products, and carries out upgrading and innovation to the products which can better meet users' requirement. Always in pursuit of excellence, people of CVM aim to develop ties with mass users for joint development on the conditions of complete varieties, high grade product & service, better Quality and ensures sufficient competitiveness on both price and after-sales service. CVM people heartedly welcome you to join & visit with sincerity.

Dotsmark Systems India Pvt. Ltd.

Hall 1/C 49

Dotsmark Systems India Ltd., authorized master dealer for HITACHI-Continuous Inkjet Printers, HITACHI & MARK-1-

Thermal Inkjet Printers & SAVEMA-Thermal Transfer Overprinters. Our product is commercially used for marking & coding & have solutions for it in every industry. Our network of sales and service centers provides high quality service across India. Our mission is to create value for our customers through reliability, flexibility, integrity & speed. We want to make every customer feel comfortable through respect and trust. We are committed to the highest standards of ethical conduct in all our endeavors.

Hall 1/D 36

Essae®
...for Excellence

Essae Teraoka Pvt Ltd, an Indo Japanese JV headquartered in India, established in 1986, have achieved expertise in

design, manufacturing, marketing and servicing of a complete range of electronic weighing system, Point of Sale System, milk analyzers and GPS clock.

ISO 9001 accreditation, world-class manufacturing facilities in Bengaluru and Goa equipped with state-of-the-art technology, and a cutting-edge R&D facility in Bengaluru (recognized by DSIR Govt. India) are the backbone of Essae's innovative products and solutions

With a Pan India presence of more than 13 lakh

successful Installations, supported by 38 branch offices, 250+ Service Engineers, 350+ Resellers / Partners, trust Essae to ensure "Customer Delight".

Mahindra Powerol

Hall 1/A 15

powerol
by Mahindra

Mahindra Powerol is a part of the multibillion Mahindra Group's Automotive & Farm

Equipment Sectors (AFS). The company entered the field of power generation in 2001-02. Started in FY 2002, today, engines from Mahindra Powerol are powering diesel generating sets from 5 kVA to 625 kVA and Gas Gensets of 10.5kVA & 125kVA. Since inception, Mahindra Powerol has made rapid strides in the Indian genset industry. Within a very short span of time Mahindra Powerol DG sets has become the first choice of telecom majors in India. Besides Telecom, these DG sets are also powering customers from a diverse cross-sections of industries and segments. We have also embarked a strong foothold in powering the dairy industry from past 10 years.

Mahindra Powerol was also awarded the prestigious Deming Prize in 2014. The Deming Prize is a global quality award instituted by the Union of Japanese Scientists & Engineers (JUSE) that recognizes businesses that have successfully implemented Total Quality Management (TQM). The company has also won various Brand awards like Frost & Sullivan "Voice of Customer" award, Master Brand, Power Brand, Superbrand in customer trust category.

Freudenberg - NOK Pvt. Ltd.

Hall 1/A 57

FREUDENBERG-NOK
SEALING TECHNOLOGIES

FREUDENBERG-NOK
INNOVATING TOGETHER

Together, Freudenberg Sealing Technologies and its partners of the NOK-Corporation form the largest business unit of the global Freudenberg Group. The process industry segment is specialized on hygienic and highly durable sealing solutions for applications in the pharmaceutical, food, beverage and chemical industries - from standardized parts like o-rings or clamp seals to individual customer-specific products. Following our slogan "Innovating Together" we have developed special sealing materials for the dairy industry, which comply with industry-specific legal requirements and purity standards and are resistant to aggressive cleaning media, high temperatures and extreme pressures. Discover our high-performance solutions for the dairy industry at our booth.

Gandhi Automations Pvt. Ltd.

Hall 1/C 23

Gandhi Automations Pvt Ltd is India's No.1 Entrance Automation and Loading Bay Equipment

Company. This widely recognized position has been achieved over years of hard work, innovation, commitment to quality and reliable customer service. Our company designs, manufactures and installs industrial high-speed doors as well as docking solutions for the cold storage dairy industry, offering the same attentive technical support offered for other products. All our cold storage roll-up doors and high-speed freezer doors are designed to preserve both temperature and humidity conditions of a refrigerating room and ensure safe & smooth operations. Our insulated roll-up doors, indeed, through the use of advanced technologies, ensure the preservation of temperature and humidity conditions of a refrigerating room.

Insulated high-performance doors preserve the cold chain in high-traffic cooler and freezer applications. Able to open and close rapidly, they prevent drafts and resist moisture as well as reduce energy costs.

Gandhi Automations also manufactures loading bay solutions like dock levelers, dock shelters, sectional overhead doors. Dock equipment's are designed and factory-made in state-of-the-art manufacturing facility.

Our dock equipment meet international safety standards like EN1398 for dock levelers and product is CE marked.

The products offered by Gandhi Automations conform to the highest safety standards complemented with reliability and energy efficiency. The product range includes High Speed Doors, Dock Levelers, Dock Shelters, Rolling Shutters, Fire Rated Rolling Shutters, Sliding Doors, Sectional Overhead Doors, Hangar Doors, Gates, Boom Barriers.

The company is certified to an ISO 9001 : 2015, ISO 14001 : 2015, ISO 45001 : 2018 and this has resulted in continuous improvement in personnel training, production, inspection, equipment calibration, machinery maintenance, logistics and customer relations. A consistent quality product is the hallmark of Gandhi Automations Pvt Ltd.

Goma Process Technologies Pvt. Ltd.

Hall 1/B 02

GOMA PROCESS TECHNOLOGIES PVT. LTD., is a sister concern Company of GOMA Engineering Pvt. Ltd. a company more than 40 years old, provides Turnkey solutions & projects for Dairy, Ice-cream, Yoghurt, Cheese, Butter, Almond milk, RTS Fruit Juice, Pulp, Tomato Ketchup, Coconut Milk & Coconut

Water processing etc.

GOMA is the first Indian Company to develop indigenous High-Pressure Homogeniser of various capacity from 50LPH to 20,000LPH for various application. More than 5000 Units supplied all over globe.

Also, we manufacture equipment's like Pasteurizers, UHT Sterilizers, Crate washer, Cup Filling & Sealing machine (Rotary & Linear), Centrifugal Pump, Continuous Freezers, Storage tanks / Silos etc.

Fully Automated PLC SCADA based plants:

Milk Dairy Plant - Up to 10,00,000 Litres/day

Ice Cream Lines - Up to 1,00,000 Litres/day

Curd & Yoghurt Line - Up to 1,00,000 Litres/day

UHT Aseptic Steriliser - Up to 10,000 Litres/hour

Automatic Cheese Plant - Up to 20 Tons/day

RTS/CSD Beverage Plant - Up to 30000 Litres/day

Goma's Manufacturing Facility:

(Unit-I) Wada, (50 k.m. away from Mumbai), on 5 acre land

(Unit-II) Vapi - 16000 sq.ft.

(Unit-III) Surat - 7000 Sq. Ft.

(Unit -IV) Pune - for Fabrication of Tanks & Silos

Goma has a developed sales & service network with regional offices at Kolkata, Gujarat, Bangalore, Chennai, and Delhi after-sales service to its customers with ready stock of each and every sub-assembly.

We also started our Office in Nairobi, Kenya for sales & after-Sales services with well-trained Engineers to support customer 24/7.

We also have office in Dubai for customer in middle east.

We Exported To - Kenya, Tanzania, Uganda, Ethiopia, Nigeria, South Africa, Madagascar, Angola, Mozambique, Zambia, Algeria, Congo, Malawi, Sudan, Australia, France, Malaysia, Ghana, Vietnam, Indonesia, U.K, Switzerland, U.S.A, U.A.E., Oman, Algeria, Tashkent, Bangladesh, Sri Lanka, Nepal, Bhutan, Burma, Ukraine etc.

Gujarat Enterprise

Hall 1/B 21

"Solution Through Ingredients"

Gujarat Enterprise delivers solutions for your products with our technical capabilities and specialty ingredients. We have innovative ingredient solutions for

Dairy & Ice Cream products, backed with a fully equipped lab having pilot plant for Dairy & Ice-Cream, Retort, UHT & Quality testing facilities. This helps us to offer tailor-made ingredient solutions, formulation development, process optimization and much more for our partners.

We offer range of specialty food ingredients like KreAmaze stabilizer-emulsifier blends, dairy cultures, coagulating agents (GDL), hydrocolloids, fibers, natural colours & flavours, modified starches, natural alternative to sugar (Monkfruit & Stevia), preservatives, flavours & extracts, emulsifying salts, canned foods, cocoa & chocolate products, caramel range etc.

We strive to provide the best solutions to our partners with knowledge sharing, technical solutions, and sustainable results. We stand committed to Dairy industry and innovate new products & blends which help in ease of operations & cost optimization for our partners. We believe in achieving the best results with ethical practices and building productive & sustainable relations with our partners.

Ice Make Refrigeration Ltd.

Hall 1/E 02

We-Ice Make Refrigeration Limited, introduce ourselves as an ISO 9001:2015,

ISO 14001:2015, ISO 45001:2018 certified Public Limited company. We are a leading manufacturer & exporter of Industrial and Commercial refrigeration equipment since 1993, having a state of art production facility spread across an area of 3,42,500 Sqr. ft. in Gandhinagar, Gujarat (India) and 28,500 sqr. ft. in Chennai*, Tamilnadu. (*Manufacturing facility of our wholly owned subsidiary Bharat Refrigerations Private Limited). This facilities are adequately equipped to produce high-quality and diverse range of cooling solutions.

We Provides highly customized cooling solutions and accessories to diverse set of clients across Industries including dairy, icecream, food processing, beverages and brewery processing, agriculture, pharmaceuticals, cold chain, logistics, hospitals, hospitality and retail among others. We offer our products for domestic as well export requirements across 22 countries under our own brand name 'Ice Make'. We had exported our products in Nepal, Bhutan, Bangladesh, Sri Lanka, UAE, Dubai, Uganda, Kenya, Tanzania, Zambia, Libya, Algeria, Madagascar, Sierraleone, Maldives, Senegal many more.

The trust and confidence of our 25,000 + customers remain our strongest anchor, encouraging us to consistently innovate our products and service propositions.

We Provides refrigerated based solutions in both Freon and Ammonia refrigerant. Being strong and consistent in providing innovative solutions today we have 50 + products in our product basket, which includes:

- Water Chilling Plants
- Brine Chilling Plants
- Storage Tanks (Vertical and Horizontal)
- Jacketed Cooling Tank (Dimple Plate)
- Modular and Custom-Built Cold Room
- Solar Powered Cold Room
- Blast Freezer/Chiller (Custom-Built)
- Glass Door Display Chiller
- Humidifier-Dehumidifier
- Coil-in-Fin type Heat Exchanger
- Dairy and Ice Cream Plants
- Curd Incubation Chamber

Anderson-Negele is a global company specializing in the development and production of sensors and measuring equipment for hygienic applications. As your reliable and flexible partner, we aim to always provide you with the best solution for your process. The name Negele has been synonymous with innovative products of high quality for over 35 years. Our Mission is to provide best hygienic Instrumentation Solutions and Services for processors of Food and Life Sciences.

Ishwar Trading

Hall 1/B 30

Ishwar Trading is engaged in business of supplying

components for Refrigeration application like Storage, Process, Preservation & Mobile for Food, Pharma, Hospitality, etc segments since 1986. We are distribution partner primarily for Danfoss products for over 3 decades and have added several Brands like Bock, Frick, Hi cool to deliver our mission.

Our business is built on mission of Creating

Solutions, Building Relations. We love to be associated with our customer for providing complete solutions

We support the OEM, Contractors, Resellers , Institutional Buyers and Service providers of Various cooling equipment with products of world-class quality. Our business model is built to make product and service available at the right price and time. We have invested in People & Infrastructure to offer world class experience for our customers and business partners.

IndiFOSS Analytical Pvt. Ltd.

Hall 1/D 19

IndiFOSS
IndiFOSS Analytical Pvt. Ltd.

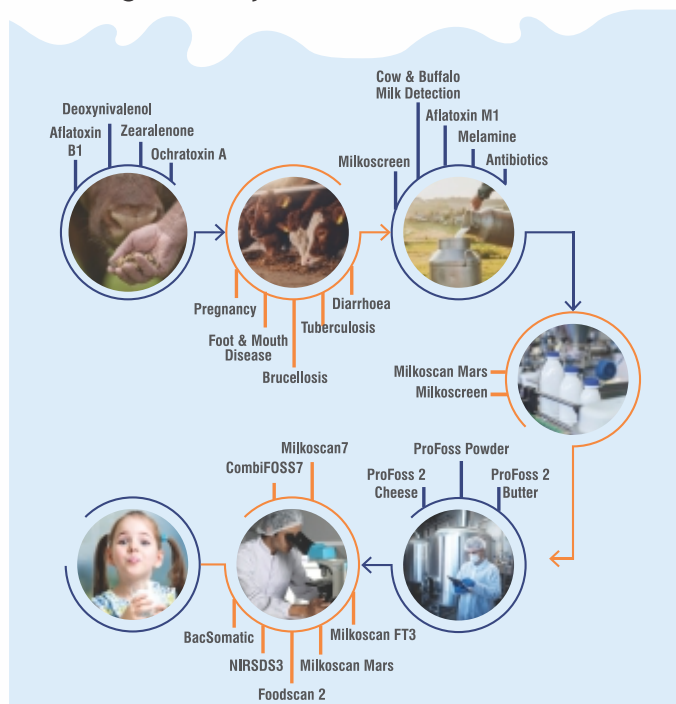

Our analytical solutions have helped Indian Dairy & Food manufacturers to

control, manage and improve the Quality of their food products, ensuring better profitability and food safety.

We represent world's leading manufacturers of Food/Dairy Analytical solutions like Foss-Denmark, Bioeasy-PRC and Generon S.p.A-Italy.

Milkoscan, Bacsomatic, Milkoscreen, DS-3, FSC2, ProFOSS, CombiFoss, Rapid & Elisa Kits for testing Antibiotics, Aflatoxins, Pesticides, GMOs, Allergens etc. are regularly used in Dairy, Seafood, Grains, Honey & Meat Industry.

Our team of >70 engineers ensure our customers get the best from 5500+ instruments and >30 lakh kits being currently at use in India.

In Conversation With

Mr. Chandrajitsingh Gohil
Vice President
Sales & Operations
IndiFOSS Analytical Pvt. Ltd.

How does IndiFOSS contributes to the overall Quality objective of dairies, through which products and describe what products we offer that will benefit the Dairy Industry and How?

IndiFOSS has been at the forefront of a pioneering movement to introduce and spread awareness of harnessing the Scientific advantages derived from utilising Analytical technologies in Dairy Industry in India and neighbouring countries. These technologies specifically utilise well established analytical techniques to help improve the quality of the most basic component of a common man's sustenance and survival i.e., Milk.

"Quality of Milk" is a very wide-spectrum term with varied connotations across the globe. There are no established references of a "Pure Milk". Milk composition and quality changes very 200km for such a vast geography like India. Soil, atmospheric temperature, water, food, breed, atmospheric air quality and so on are all variables in this sub-continent.

IndiFOSS brought around a paradigm shift at the most basic strata of milk production, at the village. Right from the milk collection centres to the Dairy processing units, IndiFOSS has hand-helded farmers as well a Dairy-technologists and partnered with them to screen and analyse the incoming milk to weed out any form of undesirable adulteration, thereby ensuring that the final produce that reaches the customer, either in form of liquid milk or milk product, is of the purest possible quality.

In sync with the quality aspects, IndiFOSS also protects the Business interests of Dairies by ensuring the highest yield and optimized ROI.

We are not "cheap", we help you earn more. Introducing in-line solutions in tandem with high technology lab scale instruments, substantially reduces their cost of production for milk products like Butter, Cheese, Ice-cream, Condensed milk, Yoghurt and a lot more.

Armed with more than 30 years of experience on developing calibrations for milk and milk products, FOSS products, presented by IndiFOSS

can humbly take the liberty to boast of the most robust of Analytical measuring algorithms. From a tiny “giant”, MilkoScreen, that sits at the village level to a high-end CombiFOSS 7 equipped with a conveyor belt facility, addressing more than 600 samples in an hour, IndiFOSS has always been a customer-centric in their approach.

Any unique technologies or innovations that you would want to introduce in the market, post Covid-19 which could be beneficial to the dairy segment?

FOSS Analytical is a pioneer and a global leader in analytical technologies for developing producer oriented, consumer benefitting and socio-economy facilitating Analytical techniques since more than 6 decades.

Some very notable introductions in the field of FTIR based Milk adulteration screening instruments have been launched by FOSS in the last 6 months.

Dynamic Adulteration Module: With a wide spectrum detection of 14 named adulterants coupled with Digital Remote log-in, control and monitoring, the MilkoScreen machine technology provides real-time data of the adulterants detected during milk collection at society level.

Digital Services Modules: The Dairy industry is today making a dash towards Digitisation in terms of Data connectivity, Data availability and Data based decision making in real-time. FOSS Manager, FOSS Assure and many such innovative modules empowers the customer for this.

MilkoScan FT3: FOSS launched their flagship product and industry first “Intelligent Milk Analyser”, MilkoScan FT3 in 2021. MilkoScan FT3 is the latest in the series of High-end Milk Analysers, instrumental in improving Quality of Milk and Milk product.

ProFoss 2: ProFoss 2, the in-line IR based analyser, give you results every 2 secs. enabling production team to make changes in the process in real-time.

What is the way ahead and future trends you see in the market?

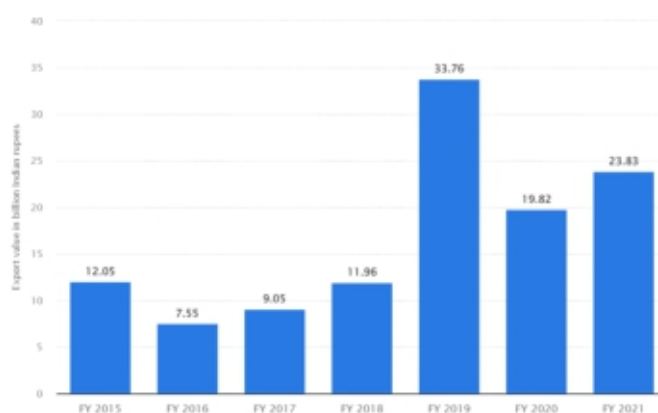

Increasing Productivity: Per Bovine productivity is critical and can be achieved by providing access to better healthcare, breeding facilities and right know-how to Dairy farmers. This helps optimize the cost of milk production and ensure the right quality.

Also, availability of artificial insemination (AI) facilities and gender determination facilities. Augmenting Production, Processing and Marketing Infrastructure: If India has to emerge as a dairy exporting country, it is imperative to modernise production, make their processes more robust, and create marketing infrastructure, which is capable of meeting international quality requirements.

Thus, there is a need for a comprehensive strategy for legal implementation of utilization of Analytical tools to ensure highest Quality standards.

Your thoughts on the global prospects of global dairy market

India's Export of Dairy products was 54,762.31 MT to the world for the worth of Rs. 1,491.66 Crores/ 201.37 USD Millions during the year 2020-21. Major products exported were Butter Fresh: Butter Milk, Milk & Cream in Powder: Milk for Babies, Other Fat: Skimmed milk powder and other milk power: Whole Milk.

Value of Dairy products exported from India between financial year 2015 and 2021

However, this is just the tip of the ice-berg as far as market potential is concerned and seen in the above figure. Moreover, India's milk production is expected to grow to 176 million tons by 2022 and far exceed the total milk production of the entire European Union.

Conclusion

After the “Pharma era” which India and Asia-Pacific enjoyed from early 2000s till recently, we are now driving the period of emergence of Food & Food Safety market. This market and industry is expected to set a scorching pace of development and growth in times to come.

Vidura Gupta
Founder
Indiadairy.com

Which is India's No. 1 'crop'? Is it rice? Or wheat? Well, neither. The right answer happens to be milk.

Milk is also India's largest 'crop' with a farmgate value (output multiplied by average price realisation) higher than that for rice and wheat combined.

The half or one litre milk packet that millions of consumers open each day is the output of innumerable dairy farmers and their cattle and buffaloes. This milk packet contains more than milk; it is a symbol of social and economic empowerment of our farmers: the marginal farmer with only one litre milk to spare has as equal access to the market as a big farmer who may be trading in hundreds of litres. And it is this indomitable strength and spirit of cooperatives that Dr. Kurien recognised and built an institution that led the nation towards its journey of becoming the global leader, by several miles, in milk production.

The Indian dairy sector has been registering a consistent annual growth for the last several years. We are the largest milk-producing country in the world. For a nation, which is still to shed the tag of being a developing entity despite its enormous size, it is no mean achievement to be sitting atop the world in this most critical food and livelihood sector. Further, this position is not likely to be challenged in either the near or distant future.

With increasing incomes, consumers are lapping up all the milk and milk products produced in the country. The milk marketers need to be congratulated on the impressive expansion of a milk marketing system that caters to the consumers in every nook and corner of the country. We are truly a milk country!

After a gap of 3 years, the India International Dairy Expo is back with the support of the Indian Dairy Association (IDA) bringing the complete dairy fraternity under one roof being dairy plants, dairy ingredients, dairy equipments, dairy technology, etc.

IndiaDairy.Com - A Dairy India venture is proud to be associated as a knowledge partner for the India International Dairy Expo (IIDE).

Hope to see you all there and together let us help our dairy industry grow further.

Inoxpa India Pvt. Ltd.

Hall 1/B 20

INOXPA is global leader in manufacture and sale of stainless-steel

process components and fluid handling equipment in food-processing beverage, dairy, cosmetic and pharmaceutical, wine making industries: mixing skids, CIP skids, product recovery systems, pasteurizers, manifolds, process automation, pumps, agitators, blenders, mixers, valves and fittings.

A key to INOXPA's success has been its strategy to act as a global company while maintaining its headquarters in Banyoles (Spain) where there is also its research and development department and an engineering center working in co-ordination with the other centers located in Spain, France, Portugal, Italy and India.

INOXPA's production centers are distributed all around the world, affording the company great flexibility.

Inoxpa constantly invests in I+D+I to adopt its products to the new applications and to approved guidelines which guarantee the quality and suitability of the products (mixing skids, cleaning skids, pasteurizers, manifolds, pumps, agitators, blenders, mixers, valves) for each industry.

List of Products for IID Promotions

1. Innova P valve- for valve clusters & applications where intermixing of 2 liquid products needs to be prevented.
2. Hyginox pump- for transfer of milk from milk reception to packing as well as CIP.
3. LR agitator- for Silos ranging from 10KL to 150KL
4. M446 Blender- for SMP, Sugar, Flavour mixing in Dairy industry.
5. CIP system- used to clean process plants & flow lines.
6. Pasteurizer- for pasteurization of milk
7. Silpig product recovery system- used to recover high viscosity products from flow lines such as, cream, curd, butter, yogurt.

Kanha Milk Testing Equipments Pvt. Ltd.

Hall 1/C 19

Kanha Milk Testing Equipments Pvt Ltd was established in 1984, ISO 9001: 2015 certified company, registered under MSME Act, one of the leading manufacturers and

exporters of Milk Testing Equipments and Dairy Instruments. KMTEPL having wide range of products including Milk analyzers, Data Processing milk collections units, Automatic milk Collection Units, Electronic Weighing Scales, Cloud Based IT solutions for data management etc. KMTEPL is one of the most reliable, cost effective, durable products, wide range of network and committed to maintain quality.

Associated Dairyfab Pvt. Ltd.

Hall 1/B 42

Kothari Group started their activities in the year 1999 under their flagship company Associated Dairyfab Pvt. Ltd. The company, since inception always offered

products with highest quality standards, at very reasonable price & replaced imported products. We Introduced Bulk Milk Coolers in capacities from 100L up to 15000L.

We are pleased to inform you that we are having a complete range of products right from the Rapid Chilling Systems, Milk Coolers and Pasteurizers. We also take turnkey projects right from supply, installation and commissioning of equipment.

We offer the complete range of the following products:

1. Bulk Milk Cooling Tanks & Accessories
2. Rapid Chiller
3. Horizontal Type Milk Silo
4. Vertical Type Milk Silo
5. Automatic Pasteurizer
6. Compact Pasteurizer
7. Heat Recovery Unit

Associated Dairyfab Pvt. Ltd. is a leading Brand in Dairy Technologies since 2 decades. Bulk Milk Coolers were successfully launched as per ISO Standards suitable to Indian Climatic conditions.

All our BMCs are with guaranteed 2All performance i.e during first milking, milk of 35 degrees will be cooled to 4 degrees, our cooling performance is much before the standard 3 hours at ambient temperature of 38 degrees.

All these products are manufactured at the state of the art manufacturing facility located in Jalgaon - Maharashtra (INDIA).

Achievements: Presently more than 4000 successful Milk Cooling Systems are running all over India and 500 all over the globe. Installation spreaded to east in Orissa, W.B., South India in Tamilnadu, Karnataka, Andhra Pradesh & Kerala, West India in Gujarat & Maharastra, North India in Rajasthan, U.P., M.P., Punjab & Bihar.

Our products are widely used by the complete dairy industry in our country and our products are being exported to 40 Countries World Wide.

Our company is also approved by NDDDB for supply of BMC with Accessories under National Dairy plan.

Khambete Kothari Cans & Allied Products Pvt. Ltd.

Hall 1/B 42

The Kothari Group ventured into the dairy industry by the year 1975 under their flagship company Khambete Kothari Cans & Allied Products Pvt. Ltd. The company, since inception always offered products with Best quality standards at cost-effective prices. We take

SINCE 1975

this opportunity to inform you that we have a complete range of products right from the milking of animals, chilling of milk and processing systems along with utilities.

We at Kothari Group would like to bring out the most efficient and economical dairy solutions for the dairies around the globe. What we believe is not only in customer satisfaction but also in customer growth. This would not only help us grow stronger together but also up lift the dairy farmers along with us in the region.

We offer the complete range of the following products:

- Complete Dairy Turnkey Solutions
- Aluminium Alloy Milk Cans and AISI 304 Stainless Steel Milk Cans from 5L to 50L capacities.
- Milk Reception equipment's
- Compact Pasteurizer
- Milk heating VAT (for cottage cheese and curd)
- Fresh Milk processor (NOVAA LAC)
- RMT (Road Milk Tankers)

Kothari group as stated before started off with selling aluminium milkcans back in 1975. The group was headed by Mr. Rajnikant Kothari who started off by selling 5-10 cans and today a pioneer in the industry. The company had been working with only milkcans for many years until when the young generation came forward in the business and introduced new models and ideas for cans. The company started selling Lockable cans and stainless cans to ensure hygiene.

KHS Machinery Pvt. Ltd.

Hall 1/A 02

Filling and Packaging – Worldwide

As an international manufacturer of filling and

packaging equipments for the beverage, food, and non-food sectors, KHS Group holds a leading position within the industry. Thanks to our 150 years' experience in the development of filling and packaging systems, we have the expertise to create innovative and sustainable solutions for the future. In particular in the area of developing PET containers and perfectly matched filling lines, KHS is one of the world's leading suppliers.

KHS has 10 manufacturing plants worldwide i.e. 5 are in Germany (Dortmund, Hamburg, Kleve, Bad Kreuznach, Worms), 3 in Americas (Waukesha-USA, Sao Paulo-Brazil, Zinacantepec-Mexico), 1 in India (Ahmedabad-Gujarat) and 1 in China (Suzhou). KHS Group headquarter is in Dortmund, Germany.

Our state of the art Indian manufacturing facility in Ahmedabad (Gujarat) is spread in 100,000 sq. meter area. In India, we manufacture European designed/quality Equipments and provide after-sales support in India and neighboring countries. We have 2000+ machines unchallenged operating in India at Coca Cola, Pepsi, RC Cola, AB InBev, Molson Coors, Carlsberg, Heineken, Unilever, Nestle, P&G, Cadbury and Indian leaders including AMUL, Davat, Parle, Podaran, Haldiram, MTR Foods, Kalimark, Xalta, United Breweries and many Indian breweries.

Kishor Agro Products

Hall 1/B 57

Samsara Desi Cow Ghee is made using pure A2 milk from indigenous Gir cows that

get the same personalised care from the tribal farmers as the Samsara family cares for the farmers. We collect milk from them, which

provides them recurring income and a sustainable livelihood. This milk is then processed into curd, which is then transformed into rich, nutritious ghee using the ancient Bilona method, as taught by the Vedas.

In Conversation With

Mr. Paresh Limbochiya
Deputy General Manager
Business Development, KHS India

While passing through recent challenging times, we learned importance of physical fitness, intake of healthy and nutritious food and above all availability of these foods. Dairy products are one of the essential healthy foods in everyone's life and acted as a lifeline during those difficult times. In their persistent efforts in service of the nation, the complete milk supply chain worked very hard and made milk products available everyday even during those difficult times. Salute to each one of them! Due to geographical reasons and restricted availability of resources, milk production/availability rate is not uniform across our country. Milk being sensitive product has short shelf life and this prevents transport of fresh/safe products at far distance/difficult terrain for final consumption. Whereas, to utilize excess availability of fresh milk, it is converted to other products which can be stored for longer time. Microbiologically safe liquid milk/ liquid milk based products for longer period of shelf life is also a matter of concern for rural area. It is high time to leverage our milk availability/capacity nationwide and explore technology so that we can cater to larger area at affordable price. In above context, we feel increase in demand of aseptically packed product at affordable price in environment friendly packaging. We suggest milk to be packed aseptically in environment friendly PET-packaging material so that final product can be available at affordable price. KHS offers the highly advanced "dry-bottle sterilization" technology which assures highest product safety for longer time. KHS-India team assures the proven top class support to Dairy/packer/manufacturer for their growth. Let's meet in person to understand the advantages of KHS-Aseptic technology and our support.

indian industries; with culture of deep dedication to the work, ardent determination to succeed and self reliant on technology, all supported by innovative schemes of the management and in house r & d efforts, satol chemicals today enjoys a premium position with straight norms among a few indigenous class manufacturer of speciality chemicals. Cleaning sanitation descaling establishment in mid of 1999, satol has emerged as a reliable speciality chemical house of india with it's trend setting technologies. Satol chemicals are biodegradable ecofriendly products taking care dairy animal farmhouses dairy process plant, dairy product section including bmc mcc beverages breweries food industries and house keeping care chemicals.

NICHROME
Integrated Packaging Solutions

Nichrome India is a Global leader in

Integrated Packaging Solutions with 10000+ installations across 45+ countries in Food, Non-Food and Pharma sectors.

Since we developed India's first indigenous milk packaging machine in 1977, we have been at the forefront of next-generation packaging technologies; a brand trusted for its rich legacy of pioneering innovation, extensive domain knowledge and manufacturing competency in packaging systems.

For enterprises big and small, for applications existing and emerging, we offer infinite possibilities in integrated, automated packaging solutions - as we partner with customers through

the complete lifecycle, offering application-specific solutions, backed by dependable service and support.

Based in Pune, India, our sales & service network spans India and the world. We have presence in 45 countries and more than 7000 successful installations worldwide.

For startups, medium sized businesses or large MNCs, for existing or emerging applications, Nichrome offers infinite possibilities in packaging solutions. That too, with one-stop convenience.

With our strong thrust on R&D, we partner with customers, study their market and specific application, and innovate integrated solutions that deliver relevant advantages.

It could be a small variation in a pouch format or customization of an existing machine; a pro-actively developed filling system or consultancy & system design for a complete packaging plant - Nichrome has the expertise, capabilities and innovation to transform productivity and enrich customer relationships in endless ways

prompt milkochill
An Innovative Instant Milk Chiller that Chills Milk at Source

In Conversation With

Mr. Shridhar Mehta
Managing Director
Prompt DairyTech

The dynamics in dairy have changed considerably due to the global pandemic. How has your company dealt with the change?

The dairy sector is established as one of the essential sectors in our country. Due to the sudden onset of the global pandemic, millions of lives came to a standstill, including the lives of our dairy farmers. This, being their only mode of income, we had to make sure that our operations continued despite the conditions around us. Thanks to our service support and our digital and cloud-enabled solutions, we have helped the dairies and farmers manage their operations seamlessly.

What are the challenges faced by your sector?

I would state one and probably the most important challenge of all - manual operations and poor data recording practices. This led to a lack of transparency and unfair payment to farmers. Technology adoption has started taking pace in our sector to bring in transparency and that is precisely what we are aiming at.

Any unique technologies or innovations you would want to introduce in the market, post-Covid-19 which could benefit the dairy segment?

Our products and solutions are Cloud, IoT, and BI-enabled, which facilitates transparency and traceability throughout the supply chain at all levels on a real-time basis. Post Covid-19 we have introduced unique innovations such as MilkoChill, an instant milk chiller to increase milk's shelf life, MilkoCheck, which can check the calibration status of any make of Ultrasonic Milk Analyzer, and TankAssure, which is an automatic milk sampler for milk tankers. All these technologies have been curated to address the needs and challenges of dairy industry.

Which are your fastest growing/moving products?

Our fastest growing product, undoubtedly, is the iSmart Milk Analyzer. It is the first smart Milk Analyzer in India to offer secured calibration through cloud or mobile app, eliminating the need for manual calibration. It ensures optimal payout to the farmer and promotes transparency. In addition to iSmart, Automatic Milk Collection System (AMCS) digitizes the entire milk procurement supply chain and empowers all stakeholders. All our products are indigenous and we strongly support PM's vision of Atmanirbhar Bharat, Prompt is a brand which is India me banta hai, India ko samajhta hai.

Your thoughts on the global prospects of the national and global dairy market

In the next five years, we plan to add centralized data of every cattle, which would allow advanced insights for the strengthening of the Animal Husbandry Sector. We plan to use Big Data Analytics to drive innovations and product development. We are focused on developing IoT-enabled products for greater accuracy, clarity, and better predictive analysis. We are also working towards 100% cashless payments and improved data transparency between all stakeholders in the dairy industry. We are aligning all our innovations in line with the Government's vision for the sector of doubling farmer's income, milk quality improvement, cold chain infrastructure improvement, eliminating adulteration, and improving livestock productivity - ultimately ensuring economic upliftment of the dairy industry.

Puraleite is Trunkey Solution provider for Dairy, Beverages, Cosmetics and Allied Industries.

Our mission is to provide turnkey solutions/ System/ Modules to optimize production processes, hygienic standards, energy savings and Automation of International Standards. We use all components of standard brands for all our modules and systems.

Puraleite is established by professionals from Dairy engineering sector. Who are having combined experience of more than 36 years of experience.

Puraleite in short period of span supplied various equipment with repeated orders from the customers. We also exported equipments to various countries like Bahrain, Sri lanka, Singapore, UAE, Africa with expected export to several countries in near future.

Some of our major equipment are

- Turnkey projects for Dairy and Beverages
- Pasteurizers
- Modular CIP Systems
- Liquid Milk processing Line
- Yoghurt/Curd processing line
- Butter and cream processing lines
- Sugar handling system
- Flavored milk processing
- Buttermilk Processing lines
- Lassi processing lines
- Ghee processing Lines

- Ice cream processing lines
- Mini Dairy plants
- Beverage processing lines
- Tubular Heat Exchangers both Aseptic and Non Aseptic applications.
- We also provide Tailor made hygienic solutions as per customer specific requirements in some cases. Puraleite also provided installation and commissioning supports directly to the end user. Infrastructure.

We have our groups manufacturing facility of about 21000 sq feet located at Pune, India. Specially constructed for Food process machine design, Manufacturing and Fabrication system. Our unit is equipped with latest machineries

Oright

Hall 1/D 42

ORIGHT is an end-to-end supply chain

digitization solutions company. An Agri-Fintech startup working towards digitizing milk procurement process and ensuring financial inclusion of farmers.

Our products and solutions comprise of:

- Milko Reader: NDRI approved Milk adulteration

and composition testing machine capable of identifying in 40 secs:

- 6 key milk adulterations
- 8 milk composition parameters
- AI enabled identification of milk i.e.

Cow/Buffalo milk type

• **ORIGHT SENSE:** One of a kind IoT device in the world capable to digitize any analyzer / weighing scale in the market and push milk procurement data from the society to the cloud server in real time. It helps to reduce the cost of AMCU / DPAMCU making it a win-win for the dairy as well as the farmer community

• **ORIGHT SMART:** A mobile phone based application comprising of modules for all stakeholders in the dairy supply chain along with data analytics to generate meaningful patterns and actionable insights for making supply chain completely transparent, paperless and tamper proof

Refrcool Solutions

Hall 1/E 39

REFCOOL SOLUTIONS is an Authorized VMR of Alfa Laval India Pvt. Ltd and delivering Plate Heat

Exchangers , Spare parts & Services for Refrigeration Industries in Maharashtra & Goa . At REFCOOL SOLUTIONS , our commitment for improvements through smart design & implementation makes us an ideal business partner for you.

We offer complete solutions for Heating & Cooling Applications through world class brand Products like ALFA LAVAL , LU-VE . we are a customer-focused company that supplies products and solutions that help you become more productive and competitive.

Ross Boilers

Hall 1/E 33

ROSS is a leading brand name in the field of process heat equipment

manufactured in India. We design & manufacture a wide variety of equipment such as hot water generators, steam boilers, thermal oil heaters, hot air generators, hot gas generators and many other related heating accessories. These heaters operate on practically all the industrial fuels available in the market in solid, liquid or gaseous form. Solid fuels comprise of the conventional fuels such as coal, lignite, wood and agro-waste fuels such as bagasse pellets. Liquid and gaseous fuels available for industrial heating are light oil, heavy oil, natural gas and LPG. Thus a vast range of combination of type of heating equipment, fuel for combustion and operating parameters is available to the industry from ROSS BOILERS. We have pioneered adoption of low cost hot water generators for milk pasteurization in the Dairy industry, thus creating a surge in setting up of mini dairy plants in the country. With this success, we expanded our product range progressively to include all the variants of industrial heating, including electrically heated hot water generators, steam boilers, hot air generators, direct fired hot gas generators and thermal oil heaters. ROSS has the distinction of launching well-engineered & researched products to cater to specific needs of our esteemed client.

In Conversation With

Mr. Utkarsh Kapoor
CEO & Founder
Oright

Any unique technologies or innovations that you would want to introduce in the market, post Covid-19 which could be beneficial to the dairy segment?

We have developed a technology by which we can help dairies identify milk type i.e. whether the milk procured is Cow milk or Buffalo milk. This eliminates the need for an RTPCR test and dairy can infer the result within 40 seconds for every sample being tested. We are further working to enhance the technology to identify the percentage of cow / buffalo milk if both have been mixed together.

This technology will be beneficial for dairies as they will save upto ₹1000 per test and 4 hour testing time associated with current RTPCR test. Dairies are required to comply with FSSAI standards for selling Pure Cow/ Buffalo milk w.r.t. to purity and quality. Having equipment like ORIGHT's MilkoReader will ensure all parameters are met and no pilferage happens across the supply chain.

What are the future trends in the market that you foresee?

Dairy sector is poised to adopt technology right at the grass root level by DDD:

1. Digitizing the milk supply chain
2. Data analysis and ML/AI to make supply chain efficient and transparent
3. Democratization of the data

This is our play field and we will strive to provide technology and product services to realize these trends and make them mainstream.

Which are your fastest growing/moving products?

At ORIGHT, we have an ecosystem of connected devices so all of our products are fast moving as they complement each other. But if you want us to narrow it down to one, our fastest moving product is our IoT device i.e. ORIGHT Sense, which is capable to digitize ANY analyzer/weighing scale in the market, and push milk procurement data to cloud server in real time. This information makes the procurement process transparent and helps:

1. Stop milk pilferage
2. Use existing milk procurement infrastructure
3. Reduce milk procurement cost

Hilda Automation

Hall 1/E 11

Entire product range:

- Filling machines. (for Water, Juice, Milk, Yoghurt/Dahi, Jelly/Jam/Ketchup/ Oil,
- Sealing machines. (Pre-cut Al.Foil type & Laminated Film type)
- Shrink Sleeve Applicator (100BPM & 200BPM) (Body & Neck Sleeving)
- Labelling machines (Single side, Front & Back, Wrap Around & BOPP-Hot melt)
- Shrink Tunnel
- Shrink Wrapping machines. (Fully Automatic & Semi-Automatic)

Randox Food Diagnostics

Hall 1/D 50

RANDOX

FOOD DIAGNOSTICS

Randox Food Diagnostics provide the global food

market with tools for the screening of antimicrobials, toxins, growth promoting hormones in animals and produce, offering superb limits of detection and simple sample preparations.

We have developed a comprehensive range of easy to use, accurate milk analysis methods for the qualitative and quantitative detection of contaminants in milk. As well as this, we also have innovative screening platforms for mycotoxins and drug residues within feed and cereals."

In Conversation With

Mr. Nikith Ninan
Randox Food Diagnostics

Any unique technologies or innovations that you would want to introduce in the market, post Covid-19 which could be beneficial to the dairy segment?

Antibiotics in milk and other dairy products are a serious health threat for consumers. Randox Food Diagnostics is committed to guarding the global dairy industry, our patented Biochip Array Technology facilitates this by accurately

detecting 130 contaminants in under 30 minutes in milk using our InfiniPlex array. Our latest Bovine Pathogen Array is ground-breaking for the dairy industry. Allowing for the simultaneous detection of 6 most common pathogens found in dairy cattle today. Utilising the Biochip Array Technology, it can detect for the following pathogens; Bovine Viral Diarrhoea, Infectious Bovine Rhinotracheitis, Paratuberculosis, Leptospirosis, Neosporosis and Fasciolosis.

What are the future trends in the market that you foresee?

One of trends that we foresee will be a substantial increase in testing and continued surveillance & monitoring by FSSAI. This will ensure the safety and quality of milk and milk products from aflatoxin M1, melamine and antibiotics, building consumer trust and awareness.

Which are your fastest growing/moving products?

Our fastest growing products in India would be our Evidence MultiSTAT analyser and InfiniPlex test kits. The Evidence MultiSTAT, a milk tanker level testing analyser, meets the dairy industry requirements by screening for a vast array of contaminants, using our InfiniPlex kits. Extending beyond the traditional antibiotic testing platforms to include anti-inflammatories, corticosteroids, growth promoters, anti-parasitic, mycotoxins, novobiocin, melamine and cyromazine. Screening for multiple contaminants from a single sample is the major advantage of the InfiniPlex kit, covering more than 130 compounds of authorised & unauthorised substances in milk.

How long have you been associated with IIDE and your views on this platform?

This is our 1st time in IIDE, Randox Food Diagnostics is excited to be part of this segment focused event. We look forward in meeting our prospects and learning more about the current trends in the Dairy market in India. Please stop by our Booth # D 50.

Sage Hill Northwest, Inc.

Hall 1/B 55

Sage Hill Northwest, Inc., a United States Hay and forage exporter, started in 1982 with just a few ambitions—we simply

wanted to provide quality feed to dairy animals. Today Sage Hill has grown to offer hay from facilities that are strategically located along the Western United States. We provide an experience and forage selection that gives our customers versatility to meet the companies needs and the needs of the animals they feed.

For more information about our history and products

please go to www.sagehillnw.com.

Samarpan Fabricators Pvt. Ltd.

Hall 1/C 12

SAMARPAN
FABRICATORS PVT. LTD.

Samarpan fabricators pvt ltd started way

back in 1978 when indian packaging machinery industry was in infant state. Beginning with vertical ffs machines to pack milk and later edible oil we gradually diversified into other application areas like powders, granular products, snack food and solids. Initially machines were made in colaboration with leading european manufacturers like prepack and uva. Being leaders in packaging for dairy industry, we are also into high speed

linear and rotary cup fillers and sealers. Packing speed is from 20 cups/min to 100cups/min. These machines are typically used to pack curd, lassi, flavoured milk etc.

Testo India Pvt. Ltd.

Hall 1/B 44

Testo India Pvt. Ltd. a 100% subsidiary of Testo SE & Co KGaA, is a world leader in

design, development and manufacturing of portable test and measuring instruments. We offer a wide range of products specially for food & processing industry for measurement during entire chain, right from farm to fork. We help HACCP compliant measurement during storage/warehousing, transport, production and preparation of food.

- pH meters for measuring pH value and temperature of liquids & semi-solid media.
- Penetration and IR thermometers for measurement of core and surface temperature of food respectively.
- Data Loggers for continuous monitoring of temperature & humidity in warehouses, cold storages and during transit.
- testo 191 Data Loggers - temperature and pressure monitoring in sterilization, pasteurization and freeze-drying processes

SCHNELLER
ENGINEERING PVT LTD

SCHNELLER ENGINEERING is the emerging turnkey supplier of Dairy Plants with full automation capabilities and MIS based solutions. Our solutions are customised, perfect, accurate, and economical giving us a competitive edge against other organizations.

Our solutions are 360 degree - from conceptualizing to commission. This enables us to deliver a streamlined control of the plant floor along with better integration of production information.

We take pride in our team that is continuously involved during the project and even after commissioning. This constant support enables us to deliver guaranteed results for your processes. Our entire workflow is setup keeping the client in mind and empowers our client to deliver consistent results while complying to all requirements.

Customer satisfaction is paramount and we believe in active feedback. This, coupled with proactive communication, and transparent processes enables Schneller to lead by example. We follow industry standards but believe in setting industry trends. We are committed to deliver quality solutions

through our expertise of being the total solution provider for over a decade.”

DAIRY SOLUTIONS

SCHNELLER is a premier solution provider for turnkey process plants like liquid process plant (50KL to 10LLPD), Powder Plant (5TPD to 30TPD), Curd/Lassi/Buttermilk Plants, Paneer Plant, Cheese Plant, CIP System, and other dairy products. We offer one-stop solutions for Turnkey Utility Supply like Boiler, Electrical Switchyard, RO/WTP plants, ETP, Refrigeration Systems, Air Compressor Systems, etc.

We also assist dairies with migration from Manual Plants into Fully Automatic Plants thereby increasing their efficiency and productivity at an economical cost with minimal disruption to their normal processes.

ELECTRICAL & AUTOMATION

SCHNELLER also offers solutions that automate entire Discrete & Sequential Dairy Process Application using PLC/DCS, PCC, iMCC, etc. helping to build a fully automatic and energy efficient plant.

MIS / ERP SOLUTION

SCHNELLER also has a vast experience in providing MIS/ ERP Solutions that integrate into dairy segments enabling complete control and monitoring of entire plants.

Home and Personal Care products. Serac has 6 factories located in the United States (1), France (3), Brazil (1), Malaysia (1) and 11 sales offices in the United States, France, Brazil, Malaysia, India, Indonesia, the United Arab Emirates, Japan, China, Spain & Moscow. More than 6,000 machines have already been installed in more than 120 countries

Spectra Plast India Pvt. Ltd.

Hall 1/A 29

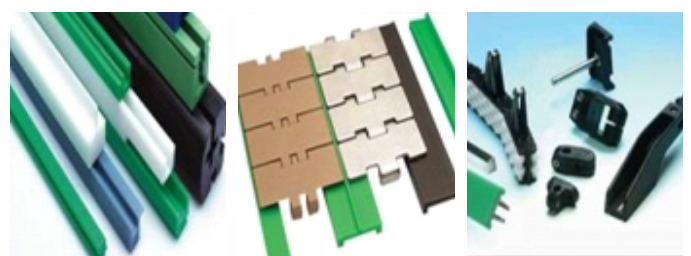

Spectra Plast India Pvt. Ltd., is a leading manufacturer and

exporter of conveyor beltings, chains and its accessories. With an expertise of 21 years and team of 250 strong members and a network well established across 25 countries around the globe, we serve the conveyor manufacturers, machine builders, Bottling, food processing, Dairy, Automotive industries etc.,.

Our range of products includes Modular belt, Slat chains, Wiremesh belts, Conveyor rollers, Wear strips & Guides holding more than 1000+ varieties of products in stock.

We are pioneer in the field of tailor made engineering plastic components, with expertise in material selection and providing specific solutions to niche applications. Being one of the largest machine shops we manufacture tailor made engineering plastic components from UHMWPE, Cast nylon, POM (Delrin), PEEK, PTFE, PP, PU etc. We are Authorized distributors for Rexnord range of conveyor components (Flatop, Matop & Marbett), with more than 750 products readily available at our state of art warehouse.

Universal Oleoresins

Hall 1/B 17

Established in 1981 at Kochi, the commercial capital of Kerala and the Spice Coast of India. Universal Oleoresins is governed by the philosophy of - providing products geared to the market

requirements coupled with top quality and breakthrough Innovation. We are Manufacturers and Exporters of fine quality Spice Oils, Oleoresins, Natural Colours and Spice Drop™ range of Instant spice extract. We are exporting various Spice Extracts and Oils to more than 40 countries since last 37 years. We are a Kosher, Halal, FSSC certified company. Universal Oleoresins is an affiliate of Shah Group of Concerns, which enjoys an enviable position in the fields of Tea Exports, Manufacturing Rotomoulded Products, Vacuum Formed Products, 3 Dimensional Displays, Stock Broking, Outdoor Advertising and Real Estate. Today Universal Oleoresins has become an internationally accepted company in the field of Spice Oils and Oleoresins. We are supplying Natural Spice Extracts to

various dairy industries in India & they applying our spice extracts to their products like Flavoured Milk, Ice Creams, Milk Shakes, Yogurt, Butter Milk etc.

Vedic Pac Systems Pvt. Ltd.

Hall 1/B 33

Systems (An ITW Company) & secondary packaging solutions from Cama Group.

Vedic Pac Systems Pvt. Ltd. are long standing partners of AZO, AMIXON, LOMA & CAMA in India with a team of qualified engineers to do the installation, commissioning & after sales service.

AZO GmbH + Co. KG of Germany are pioneers in ingredient automation. AZO supplies complete plants, starting from sack tipping stations/feed hoppers, big-bag discharge stations, screeners/sifters, pneumatic conveying systems, storage silos (indoor & outdoor), batching systems, dosing units etc., for handling of milk powder & infant formula. AZO also supplies stand alone equipment such as salters & liquid screeners. AZO has proven experience to execute projects on turn-key basis, by partnering with spray dryer suppliers of global repute & AMIXON GmbH for vertical shaft mixers. Their sister company, AZO Liquids, specialises in homogenising solutions. Vedic Pac Systems also provides metal inspection, check weighing and x-ray systems from Loma

Rounded out with complete closure applicators for caps, lids, pump dispensers and trigger sprayers, our packaging solutions are suitable for most of all the product viscosities. Come discover how our customizable technologies can meet your specific needs and requirements. We'd be glad to help in finding the best solution for your business.

Tempo Instruments Pvt. Ltd.

Hall 1/C 37

Controlled Temperature Solution

Tempo Instruments Pvt. Ltd.

Incorporated in 2008, an ISO 9001:2015

certified manufacturer of high quality and innovative laboratory and scientific equipment for the global market. We have expertise in innovative product manufacturing that adds value to the customer's portfolio.

Over the past years, TEMPO has worked with industry leaders to design solutions for production and research needs across the entire constant temperature / environment spectrum. TEMPO markets a complete line of products under TEMPO brand which complement our OEM manufacturing capacities. TEMPO's reputation has been built on innovation, high quality and long term partnering. TEMPO focuses to provide economical equipment's to Research institutions, Universities & colleges & manufacturers in industries such as electronics, Pharmaceutical Research, Cement, Steel etc. TEMPO has established its manufacturing facility at MIRA ROAD, Dist. Thane. The infrastructure is facilitated with sophisticated fabrication, Electrical & Refrigeration department with expert engineering team, well equipped and trained Quality control department.

Weight Pack

Hall 1/B 34

High precision net weight filling of high value liquid products is our specialty. The technology is at the heart of all we do since our founder began experimenting with load cells on rotary fillers more than 45 years ago.

**ZEUTEC Opto-Elektronik
India Pvt. Ltd.**

Hall 1/A 54

ZEUTEC

ZEUTEC Opto-Elektronik (India) Private Limited is a 100 % sister company of

ZEUTEC Opto-Elektronik GmbH in Germany and our company is dedicated to Sales & Marketing, but what is more important, our Service & Application Center for India and Asia. Besides direct sales and sales support, a strong application team is standby to answer all your application related questions from apple juice to zucchini powder analysis. In case something goes wrong with your instruments in operation the service team will step in and help to get your system up and running again.

ZEUTEC Opto-Elektronik GmbH Develops and produces specialized NIR spectrometer instruments for scientific and industrial applications. Our product range of spectrometers and accessories covers analyzers for routine laboratory applications with a multitude of accessories for the sample conditioning and presentation. Dedicated analytical solutions are available for AGRICULTURAL, FOOD, BEVERAGES, DAIRY, WINE, BEER, SPIRITS, OLIVE, GRAIN, Research & Academia and industrial applications. For more information please visit our website:- www.spectralyzer.com

Zeutech Engineers Pvt. Ltd.

Hall 1/E 50

Zeutech Engineers Pvt. Ltd. or precisely Zeutech is the leader in manufacturing of sanitary design stainless steel pumps and equipment for dairy, food, beverages, chemical, pharmaceutical and related industries. From last 29 years we have been

delivering the best in class quality and unmatched service to numerous organizations in pan India and abroad. Our range of products includes Process Pumps, Evaporator Pumps, Shear Pumps, Self-priming pumps, Lobe pumps, Powder Blender for Milk Reconstitution or Sugar Dissolving. Our range of equipment also include Pasteurizers, CIP Systems, Heat Exchangers & New Generation Heating Systems, Mini Dairy Plants etc.

Efficiency, Durability, Reliability, Robustness, Flexibility, Advanced, Affordable are some of the salient features of the Zeutech make pumps and equipment. Since 1992 we have been providing unlimited pumping solutions to many co-operative and corporate dairy sectors in India. We also deliver customized solutions tailored for specific requirement so that the suitability of the solution is optimum. We live by our motto "Solutions Unlimited" and we mean it when we say "Unlimited". We are truly Indian company with Global Standards in line of 'Make in India'. For numerous organizations, we remain always as a valuable contributing partner of growth, achievement, success and sustainability.

Zeuser Engineers India Pvt. Ltd.

Hall 1/A 16

A state of the art technology based company committed to serve the Dairy, Beverage, Grains, Fruits & Vegetables,

Edible Oil and Spice industries through tailor made solution to product requirements and through quality assurance. The mission statement of the company is total customer satisfaction through quality assurance based on a holistic approach. Product Ranges: HTST Pasteurization Plant, Sanitary Centrifugal Pumps, Storage Silos, Vats, Evaporation & Spray Drying Plant, CIP System, Milk by-products Plant, Beverage Plant, Processing & Packaging setup for Grains, Spice & Edible Oil. Our services include total engineering and design solution to above process industry from conceptual stage to commissioning and all the products will confirm to international standard. The fabrication shop of the company is also equipped for any variety of material of construction from stainless steel 304/316 titanium (Special application).

Agnext Technologies Pvt. Ltd.

Hall 1/A 58

AGNEXT AgNext, one of the world's leading deep

tech-powered agritech startups out of India, is on its mission to make food value chains fairer, safer & transparent. Founded in 2016, we are building a pioneering global agritech company that integrates AI-tech to digitize food trade, accelerate decision making, build trust and infuse next-generation technologies to enable fairer trade across the food value chains.

Unique applications of full-stack solutions to standardize food quality has powered our growth across diverse geographies. Having raised India's largest Series A funding in the agritech space till date, we are furthering our investment in advanced R&D initiatives, scaling-up talent acquisition across domains and building a robust presence in newer geographies to diversify our commodities portfolio.

We envision making technology & quality the epicentre of all food trade transactions with 5% of the global food moving through AgNext in the next five years.

Gujarat Co-operative Milk Marketing Federation Ltd. (GCMMF)

Hall 1/C 55

Gujarat Cooperative Milk Marketing Federation Ltd. (GCMMF) is India's largest food product marketing organization with an annual turnover (2020-21) US\$ 5.3 billion. It is the apex

organization of the Dairy Cooperatives of Gujarat, popularly known as 'AMUL', which aims to provide remunerative returns to the farmers and also serve the interest of consumers by providing quality products which are good value for money. Its product range comprises milk, milk powder,

milk beverages, ghee, butter, cheese, ice-cream, paneer, chocolates, and traditional Indian sweets, etc. During 2020-21, GCMMF has procured 24.6 million liters milk per day from 18,600 village milk cooperative societies, 18 member unions covering 33 districts, and 3.6 million milk producer members of Gujarat. GCMMF is India's largest exporter of Dairy Products. Many of our products are available in USA, Gulf Countries, Singapore and Australia. For its consistent adherence to quality, customer focus and dependability, GCMMF has received numerous awards and accolades over the years. Today, Amul is the 4th most valuable dairy brand in the world and is also recognized as the 2nd most strongest dairy brand in the world as per independent survey.

Ascent Technologies Pvt. Ltd.

Hall 1/C 33

B Bornemann
An ITT Brand

TT Bornemann introduced the SLH Hygienic

twin screw pump

to the Dairy industry in 2004. The design was based on 150 years of twin screw pump technology aligned to the special hygienic needs of Food, Pharmaceutical, and Chemical processes.

In the Dairy industry, the SLH pump meets the strict industry requirements with its hygienic design. The pump is used for conveying yoghurt (fruits and toppings), milk and dairy products, curds, melted cheese, butter, margarine, ice cream, concentrates, and eggs. Applications include unloading tankers (including mobile unloading), aseptic filling, pressure boosting UHT, feeding of UHT, homogenization, pasteurization, and transferring product.

Today, ITT Bornemann serves hygienic and sanitary applications with seven series of modular pumps,

complete with mechanical, electrical and control systems. All are EHEDG and EHEDG Aseptic approved and comply with 3A Sanitary standards. With 50 different pump hydraulics, 500 design options and more than 10,000 installed pumps worldwide, ITT Bornemann - The Original - is the undisputed world leader in hygienic twin screw pump technology.

Digivridhi Technologies Pvt. Ltd.

Hall 1/C 27

Digivridhi Technologies Private

Limited(DGV) is a Agri FINTECH startup, since its inception in 2019, DGV takes pride in creating the First Dairy Neo - Banking Platform in India and aspire to empower 75 million dairy farmers and 2 lakh milk societies/ FPOs with financial services and productivity enhancement tools through innovation, with dairy farmers at its core, DGV enhances their relationship with Milk Societies and Dairy Unions, it has set up Milk Micro-ATMs in 390+ milk societies in rural India across 18 Dairy Unions in Gujarat.

DGV binds these three with world-class Banking Services and Financial Access Infrastructure, digitalizing their processes and generating rural employment.

Elcorp Chemicals

Hall 1/E 48

Specialising in manufacturing speciality disinfectant, sanitizers, and water treatment products, Elcorp Chemicals an

ISO 22000 and GMP certified industrial chemical supplier, manufacturing various different chemicals formulations with applications in F&B, Dairy, Pharma and Healthcare sectors

With environment friendly products, our ISO 22000 certification enables our customers to use our speciality disinfection products to maintain sterile area compliance as per international standards.

Our products cater to industries like Pharmaceutical, Food and Beverage, Icecream manufacturing, Packaged Drinking Water, Hospital

and Healthcare, Biotech, and others.

With vast domain knowledge and expertise, we assist our customers by providing technical support and guidance. We strive to develop customized products/solutions for our customer's specific needs/requirements. Our aim is to develop eco-friendly products which would be safe to use and have minimum impact on the environment.

The company was established in 2007 as a specialty disinfectant manufacturing chemical company, and has developed a range of innovative products over time. Our user list includes companies like Orissa Milk Federation, Kwaliti Dairy, Suruchi Dairy, Bengal Nestor, Thacker Dairy and many more.

Fillpack Technology

Hall 1/D 02

Fillpack Technology' is very well known as a pioneer & one of

the Leading Manufacturers for Bottle Filling Machines and Paneer Cutting Machines Manufacturing Sector. Over the years, Fillpack Technology has invested its time & money in understanding & developing the 'time & money saving solutions' for customers' various types of customised needs.

As a result, today, presence of Fillpack Technology is appreciated by its' clients unquestionably in the industrial segments of Dairy, Food - Beverages, Juice and Pharmaceutical in India and abroad.

Today, Fillpack Technology has 2 State of The Art production facilities at Thane & Ambarnath near Mumbai, India. Main production unit is located at Thane & an R & D Centre at Ambarnath are well equipped with a team of highly qualified designers, engineers and food technologists for customer satisfaction. Fillpack Technology has a wide range of sales & service network all over India & abroad with its' Central Headquarter situated at Ambarnath, in the state of Maharashtra, India.

In recent years Fillpack Technology has expanded its product basket, by providing Complete Turnkey Basis solutions also.

Apart from providing Turnkey Basis Plant for Milk, Fruit - Beverages & Ice Cream, just have a glance at Quality Machines being manufactured by Fillpack Technology:

- Bottle Filling Machines
- Pouch Packing Machines
- Sachet Packing Machines
- Paneer Slicing & Cubing Machines
- Cup Filling & Sealing Machines

- Vacuum Packing Machines etc.

All above mentioned machines are manufactured after considering the customised needs of small & big scale entrepreneurs by giving them options for automatic & semi-automatic suitable to their budget. In addition to all these, all Machines are ISO Certified and CE Marked for export as per the national and international governments existing norms. Fillpack Technology presently is having a large customer base of its happy clients not only in India but also in Germany, UK, UAE, US, Canada, New Zealand, Australia, Africa, Sri Lanka and Nepal.

Gecitech India Pvt. Ltd.

Hall 1/A 23

Gecitech India is a 60:40 Joint Venture company

between Gecitech and self. India is now the 4th country for assembling Gecitech hoses after France, USA and Japan. Gecitech India will be operating completely on quality benchmark set internationally by its other assembling units. Gecitech India is going to cater to India and surrounding country markets. Current as Gecitech we have a huge dealer channel network and are present in over 60 countries and this will help us serve you better.

We wish to highlight that Gecitech, France are the worldwide leaders for Hygienic Hoses across the globe. Gecitech products comply with highest quality needs and are also equipped with specialized designs like Reusable Fittings. The Reusable Fittings can be reused on the hose replacement, thereby bringing huge savings to the customers over the years.

Fossil Steels

Hall 1/E 44

Fossil steels in North India for

manufacturing

tubes for hygienic applications in ASTM A249 & ASTM A269 Standards. Based In Bhiwadi Rajasthan , Our tubes has passed all rigorous quality test internally as well as proven track record of past installations. 3MTR to 12MTR bright annealed , hydro tested tube we customise as per all Industries. Email us : Fossilsteels@gmail.com or contact to : 8888298888

Capsicum

Hall 1/A 41

AATMIL
MILK VENDING MACHINE

Capsicum is a leading manufacturer of Milk vending

machines AATMIL, as AATMIL is a series of milk vending machines developed by Bhavsar Brothers in India, it aims to discard adulteration, contamination and provide accurate milk to customers. Since the research and development is done all under one roof by us (Bhavsar Brothers), we have successfully developed a very advanced machine with very reasonable price. The new dairy equipment will help people to distribute milk with ease. We aim to be the best vending machine supplier in India & UK. This advanced automatic milk dispenser machine is a standalone unit with all latest features installed.

Frick India Ltd.

Hall 1/A 30

(An ISO 9001:2015; ISO 14001:2015 & ISO 45001:2018 Company)

The Largest Equipment Manufacturing Company and Turnkey Solution Provider for all Industrial Refrigeration

Applications.

FRICK INDIA LIMITED was incorporated as a public limited company in 1962. Now the company has diversified and developed into one of the front ranking companies and its equipment is rated amongst the world's best.

We provide Energy efficient & Environment Friendly refrigeration solution, fully supporting to "Make in India" program. Now a front-ranking company, Frick India has been adapting to new technologies and is offering the customer the energy efficient latest systems for all Industrial refrigeration applications. Keeping this in view new products / equipment have been brought in and existing one's upgraded as per requirement prevailing in the Industry. Frick India can also provide on line Total Energy Management System (TEMS) for almost all industrial refrigeration applications.

We have started manufacturing screw compressors since 2000-01 at our works with testing facility as per ISO 917: 1989(E) standards. The rotors are being supplied by M/s Holroyd of U.K. Frick India also packages Screw Compressors using blocks from MYCOM Japan. We also have a wide range of High Speed Reciprocating Compressors. Besides compressors, Frick India has a whole range of refrigeration equipment including Product coolers, Condensers, Heat Recovery System, Pressure

Vessels (ASME) and electrical & automation systems.

Frick India also installs turnkey projects and uses their vast experience in the Industrial Refrigeration Compressor manufacturing in good stead to give energy efficient and reliable refrigeration systems in India and more than 50 other countries across the world.

The main products are:

- ROTARY TWIN SCREW COMPRESSOR BLOCKS
- ROTARY TWIN SCREW COMPRESSOR PACKAGES
- HIGH SPEED RECIPROCATING COMPRESSOR & PACKAGES
- HIGH SPEED TWO STAGE COMPOUND RECIPROCATING COMPRESSOR & PACKAGES
- FRIGID COILS 'S' SERIES (Stainless Steel Tubes & Aluminum Fins)
- FRIGID COILS "A" SERIES (Aluminum Tubes & Aluminum Fins)
- LIQUID OVERFEED SYSTEM
- EVAPORATIVE CONDENSERS
- PRESSURE VESSELS AND HEAT EXCHANGERS
- PLATE FREEZERS
- Frick India Microtech System (Automation System for the Refrigeration plants)

Hexagon Nutrition Ltd.

Hall 1/C 42

Hexagon Nutrition is a differentiated and research-oriented pure-play

nutrition company offering clinical products, micronutrient premixes, and therapeutic products since 1993. There is a growing demand for functional nutrition and Hexagon Nutrition has been able to move up the value chain with a presence across retail pharmacies, hospitals, and prominent e-commerce players. We market our products across India and export to around 70 countries to meet the demand for nutrition through Micro-nutrient premixes, Clinical Nutrition, and Therapeutic Nutrition.

"PENTASURE" is a leading name in the health, wellness, and clinical nutrition space and offers a complete source of nutrition for all age groups. The Covid-19 pandemic has made consumers increasingly aware of health and nutrition and

Hexagon Nutrition can address this rapidly emerging requirement.

Fortify Your Health With Platterful Fortified Food and join the **Tread Towards A Nutritious Tomorrow**

Benny Impex Pvt. Ltd.

Hall 1/E 43

BENNY IMPEX PRIVATE LIMITED
(MILK ANALYSERS, COLLECTION SYSTEMS AND SOLUTIONS)

Our Brands BENNY and JUPITOR are well known in the Indian Dairy industry having a solid reputation and trust over the last 50 years. We are India's leading companies for solutions and services for the Milk industry.

Sole Authorized Representatives:

- Funke Dr. N.Gerber GmbH, Germany : FUNKE GERBER LABORATORY PRODUCTS
- Bulteh 2000 Ltd. Bulgaria : EKOMILK ANALYSERS & STARTER CULTURES

Our services :

- Supply, Commissioning of Milk Analysers and AMCU's.
- Automatic on-line testing solutions.
- Kits and Analysers for Detection of Adulteration in Milk.
- Manufacturing of laboratory testing equipment - Butyrometers, Centrifuge's, Lactometers.
- Starter cultures for Dahi, Butter Milk, Probiotic Yogurt.

Hommak

Hall 1/A 201

HOMMAK
homogenizer & piston pump

Hommak is one of the leading companies in the machinery manufacturing in Turkey. HOMMAK manufactures homogenizers, laboratory homogenizers, yogurt filling machines, Ricotta Systems, and Mixers in desired capacity and pressures for dairy products, food & beverage, chemical & petrochemical, cosmetics and pharmaceutical industry applications.

Milkon Heavy Engineering Pvt. Ltd.

Hall 1/B 58

Milkon heavy Engineering company appraise as a leading Manufacturer, Supplier and Exporter of Stainless steel heavy duty equipments. Our manufactured products are broadly used in Dairy, Pharmaceutical, beverage Industries all over the country, We reassure our R&D professionals incorporate modern technologies, changing trends and keeping it organic which enhance the production scope. We have been serving to India's leading industries with our wide range of products equipments for our customers demand and target to meet their requirements with higher efficiency at optimized cost.

Neotec Packaging Systems

Hall 1/A 59

The Manufacturing world is constantly evolving, we live in an increasingly competitive, complex and fast reality. We at Neotec are always a step ahead in offering both high quality & reliable

products and in developing technological innovations that can satisfy customer needs even in the most demanding industrial conditions. India International dairy (IIDE) show has been supporting us to introduce the latest innovations in Automatic Form Fill & Seal i.e Liquid Pouch Packing machines to the customers.

Parksons Packaging Ltd.

Hall 1/A 48

Parksons Packaging Ltd is a leading folding carton manufacturer with more than 60 years of experience in the printing & packaging industry. We

work with brand leaders across industries such as FMCG, Food & Beverages, Dairy, Pharmaceuticals, electronics, apparels to name a few. We offer ParkPak™ - an end to end solution for Gable Top packaging. Made from virgin paper board, Parkpak™ ensures your product reaches consumers fresh and secure. Available in fill volumes sizes ranging from 120ml-5L. Parksons packaging has partnered with NiMCO, to offer custom solutions to fill and pack Gable-Top cartons. This is supported by a well-trained sales & service network, with an objective to provide best quality support and services.

Rahul Ferromet and Engineering Pvt. Ltd.

Hall 1/D 43

Rensa is the Made In India brand name for Hygienic Stainless Steel (304L & 316L) Tubes and Fittings manufactured by Rahul Ferromet and Engineering

Pvt Ltd. Our 20,000 sq m World Class manufacturing facility is located at Bharuch, Gujarat, India. Rensa is the only brand in India to manufacture 3A certified tubes and fittings in the same facility.

Manufacturing Capabilities:

- 120 Kms of Stainless-Steel Tubes Per Month.
 - 100 Thousand Pieces Stainless Steel Fittings Per Month.
 - 4 km of Electropolishing Tubes Per Day.
 - 2000 Pieces of EP Fittings Per Day.
 - Experience of more than 14 years in the manufacturing of Stainless Steel Pipes and Tubes.
 - Fully Integrated and automated Stainless Steel European Tube production Line
 - Integrated Fittings Production Unit.
 - Integrated Mechanical Polish (Ra<0.5) and Electropolish (Ra<0.38) Facility for Stainless Steel Tubes and Fittings.
 - Total Traceability and Documentation support.
 - Environment-friendly Bright Annealing Process.
 - Products are manufactured as per ASTM A270, A270S2, BS-4825, ISO SMS, 3A, ASME-BPE(Comp)
- Technical Brochures available for downloads at <https://rensatubes.com/downloads/>
Verification Link for 3A Certificate: <http://www.3-a.org/3-A-Symbol-Certificates/Search-Database-of-Current-Certificates>

Repute Engineers Pvt. Ltd.

Hall 1/B 12

Repute Engineers Pvt. Ltd (REPL) is a Renowned Global Indian Company that offers innovative, 'end to end solutions' for processing of Milk Dairy & Dairy Products, Beverages, Food Processing, Ice-cream, Cheese.

REPUTE established in the year 1998 in Pune, and it has gained its popularity as a "Reputed Turnkey Plant Supplier" in the Dairy Industry. Incorporated as REPUTE ENGINEERS PVT. LTD, .in the year 1998.

Company is equipped State-of-the Art manufacturing infrastructure with highly qualified & Experienced technocrats, production, & After Sales Service Team.

The Company is accredited with ISO 9001 Certification and financial sustainability is rated

by CRISIL

REPUTE Provides complete “Turnkey Solution” for Dairy plant starting from the raw milk reception to liquid milk processing to packaging. Also offers compact skid mounted, automatic and semi-automatic processing systems for Dairy products like Curd, Yoghurt, Buttermilk, Butter, Ghee, Paneer, flavored milk and Ice-cream (Both Milk & Veg oil based). Our product line also include UHT Milk and Mozzarella cheese plant of various capacities

REPUTE provides complete “Turnkey Solution” to Beverage Industry. Has supplied complete processing plants for Carbonated & Non carbonated Cold Drinks, Fruit Based Ready- to-Serve Drinks, ORS & Glucose Based Drinks, & Energy Drinks. We offer complete plants including Homogenizers, Pasteurizers/Sterilizers.

REPUTE also has tied-up with Leading International Brand Equipment Suppliers from Europe for supply of key equipment & systems:

- High pressure Homogenizer and piston pumps from BERTOLI (A BRAND OF INTERPUMP GROUP, ITALY). There are over 500 satisfied customers of our homogenizers ranging from 500LPH to 20000LPH.
- Self-cleaning cream Separators & Bacto-fuge from REDA SpA, Italy, are available with automatic standardization units of capacities from 5000 LPH to 40000LPH.
- UHT Systems (ULTRA HIGH TEMPERATURE) from REDA SpA, Italy, for milk and milk products with direct & indirect heat treatment and REDA's patented ‘Steriflex’ method of heating. There are about ten UHT plants already working satisfactorily in India, connected with various types of aseptic packaging like carton, cups, pouches and bag in box/drum.
- Mozeralla cheese making plant and machinery from Milky Lab Srl, Italy is available with production capacities ranging from 500Kg/day to 20000Kg/day. We have successfully established few mini plants across the country.
- Aseptic pouch filling machines from THIMONNIER, France, are available in various capacities with one/two/three/four head filling. There are about 20 machines already in operation across the country.

Research & Development and Innovation in Technology is the backbone of REPUTE. Since beginning Company has given high emphasis on the

innovation & kept upgrading the Technologies with flying time. This helped REPL to offer most productive and efficient Solution with lower operating costs, which is ultimately increasing the profitability of our Clients.

REPL wants to showcase Technological strength/solution in the Field of Dairy, Beverages and Food Processing. Coincidentally REPL is completing its Silver Jubilee year of Establishment and also recently unveiled its new Company LOGO. IIIDE is going to be a good platform as this is much anticipated Trade Show after the pandemics.

REPUTE offers “One Stop Shopping Solution” in the Field of Dairy, Beverages, Ice-cream, Food Processing Field, which will be very useful for all type of Visitors and particularly who are planning to set up new Establishments.

Sterdill Equipments Pvt. Ltd.

Hall 1/E 16

STERDILL was established in 1989 as expert in quality fabrication of various Food, Chemical, Pharmaceutical, equipment. Promoter's & Manager's varied experience with FABWELL since 1972 allowed us to manufacture our own product range such as Sterilizers etc.

We manufacture retorts for food Industry in India since 2012. Many type of products Process with Retorts as follows Dairy & Drinks, Ready-meal, Soups, Vegetable & Fruit, Meat & Sausages, Seafood, baby food, Pet Food, Nutraceuticals etc.

Sunfresh Agro Industries Pvt. Ltd.

Hall 1/D 52

The origin of Group Lactalis, dates back to 1933. It all began one October in Laval, France. Over the years, the company has grown manifold and become

the foremost name in milk and dairy products across the globe. In India, the company is gradually spreading its presence with the acquisition of well-established dairy brands like Thirumala Milk Products in the south, Anik Industries in the north and Sunfresh Agro Industries Pvt. Ltd. (Prabhat dairy) in west. Lactalis India also imports Président, its premium butter and cheese brand, which is a favourite across Europe.

Lactalis has acquired Prabhat dairy in 2019. Prabhat dairy is an integrated milk and dairy products company in India, catering to institutional as well as retail customers. For the past 15 years, we have established ourselves as one of the most trusted dairy brands in its category. With the state-of-the-art plant, cutting edge technology and stringent quality standards, our products deliver unmatched quality.

Technofour Electronics Pvt. Ltd.

Hall 1/B 45

Technofour Electronics Pvt. Ltd (TEPL), India's leading manufacturers of "Product checking systems" for the food, FMCG and Pharmaceutical Industry TEPL Manufactures Metal Detector,

Dynamic Checkweigher and Combi-Checkers (combination of Metal Detector and Checkweigher) with over 15,000 Metal Detection systems & 4500 Checkweigher) with over 15000 Metal Detection systems & 4500 Checkweigher system installed & operating successfully in various Pharmaceuticals,

Food soap & chemical Industries in India and around the globe, TEPL is a leader in Product checking system in India and now spreading their footprint around the globe our Metal Detection systems and Checkweigher systems meet the GMP norms and most of the International standards and they have been exported to Europe, South East Asia, Middle East, and African countries.

Kaira District Co-Operative Milk Producers' Union Ltd. (Amul Dairy)

Hall 1/A 46

The Kaira District Co-operative Milk Producers' Union (Amul) is headquartered at Anand. It was formally registered on December 14, 1946 (Celebrated completion of 75 years on 31st October 2021).

It's a manufacturer & Supplier of Milk and Milk products, Sweet products, Bakery products, Amul Organic Fertilizer, Amul Cattle Feed & Feed Supplements.

Planners, economists, administrators, dairymen, journalists have been visiting Anand to study the ingredients of its success. The Anand Pattern is essentially an economic organizational pattern to benefit small producers who join hands forming an integrated approach in order to economy of a large scale business.

While we may take pride in inspiring the whole nation and revolutionize the dairy co-operative movement in our country alleviating hardships of millions of dairy farmers and placing India in number one position in world in milk production, we remain humble in our approach and development firmly believing in that the true development of an organization or nation lies in development of people - our farmers.

Varalka Heat Exchangers

Hall 1/D 22

VARALKA is a leader in the area of heat transfer

equipment - plate heat exchangers and air blast oil coolers. Today, our heat exchangers are serving in most difficult applications in dairies and ice-cream factories, cold storages, food and beverage plants, steel plants, mines, power plants, hydraulic presses, special purpose machines, fertiliser plants, chlor-alkali plants, cement plants, cone crushers etc.

The company was founded in 2000 with a vision to deliver reliable and long-lasting heat transfer solutions to Indian customers. 20 years in the challenging and uncompromising Indian market, has prepared us to put together a product range which offers value for money with all the necessary features for durability, reliability and satisfactory performance over the lifetime of the heat exchanger.

manufacture and supply Milk pasteurizer's, Paneer Plant, Ghee Plant, Curd Manufacturing and many more. For Milk storage, we manufacture all sizes of insulated storage tanks of all shapes such as Horizontal tanks as well as Vertical tanks (Milk Silo), In Milk Transport we have all sizes of insulated Milk Tankers.

We are also in Design, Manufacturer & supplier of various brewery equipment's such as Fermenters, Spirit Tanks, CIP Systems, Refrigeration Systems etc. These plants and equipment's are been supplied all over India and we are having our service network to cater the customers to their entire satisfaction.

Company is situated at C- 56,57,58,69,70 & 71, M.1.D.C. Baramati. In Pune Districts & having a 60000sq. foot area with 30000sq.ft built -up shop floor area with overhead crane facility & 4000sq. foot office area, Shop is well equipped with all required machineries & qualified workers & dynamic team of engineers & supervisors to execute work at shop floor.

Also, we are in process of setting up a new production unit at G 313,314,317,318, M.I.D.C.Baramati. In Pune Districts having 60,000sq. ft floor area with 30,000sq. foot built-up area. Shortly this will be put in operation.

Company is in NDDB's (National Dairy Development Board) approved list of manufacturers for Bulk Milk Coolers. We have honored by INDIA 5000 BEST MSME AWARD-2018 for best Quality equipment manufacturing company.

Venture Steels Pvt. Ltd.

Hall 1/B 23

(VSPL) established in the year 2004 and is one of the largest Milk processing equipment manufacturers, engaged in design, manufacturing, of Bulk Milk Coolers, Instant Milk Chilling

Units, Cleaning In Place System (CIP Systems - Fully Automatic) & all kinds of Milk Processing equipment's. We are also into the Milk Collection, Milk Transport and storage. We also undertake the Turn-key Projects for Milk Processing. For Milk Refrigeration we manufacture Bulk Milk Coolers of various sizes and shapes, Instant Milk Chilling Unit, Milk Chilling plants. For Milk Processing we

Konfluid Engineers

Hall 1/C 60

KonFluid Engineers

KonFluid Engineers is Indian

Distributor for Satron Instruments Inc, Finland (Europe). We offer Online Turbidity and Solid Content Analyzers and food grade versions of Pressure and Level Transmitters. Our company strives to be reliable supplier to offer high quality Satron make Instruments among Indian Dairy and Food & Beverages sector.

Typical Applications of Satron make Turbidity Analyzers: CIP Process Optimization, Phase Transition, Leakage of Milk in Heat Exchanger, Waste Water Monitoring, Condensate Line Monitoring, FAT monitoring etc.

We also offer High Quality Flow Meters and Pneumatics components.

leadership, strong core values and unwavering customer support to accelerate innovations enabling our customers to achieve maximum success.

Select Packaging Machinery Pvt. Ltd.

Hall 1/C 12

Select packaging machinery pvt ltd a group company of samarpan

fabricators pvt. Ltd. A mumbai based group is a leading manufacturer of packaging machines in india. We make machines to pack liquids and different types of solids, granular and powder products catering to varied industry segments ranging from dairy, snack food, staple food to pharma, pesticides, fertilisers, consumer products etc. We have been supplying machines over the period of 40 years within india and abroad. Samarpan/select is also into vacuum and thermoforming machines and horizontal flow wrap machines. With this range we entered the consumer product segment in a big way.

MEDH

Hall 1/D 30

A trusted, collaborative partner to the world's leading food

companies, Medh is a fundamental enabler for innovations within the dairy and dairy industry. Our innovative dairy equipments and services allows our customers with faster, reliable and better machines. We combine superior technology

Ashtavinayaka Technocrafts Pvt. Ltd.

Hall 1/D 23

ATPL (Ashtavinayaka Technocrafts Pvt Ltd) is one of the leading and pioneer company that specializes in Dairy Processing Plants and Equipments, Food processing plants and

Equipments We have 2 fully equipped manufacturing facility set-ups of 4000 Sq. Mtrs and 2000 Sq. Mtrs - Fully equipped with ultramodern equipment and facilities to fabricate high quality Stainless Steel (SS) processing equipment to meet the high quality International standards.

ATPL also undertakes Greenfield turnkey projects for Milk processing plants, Cream, Cheese, Butter and Ghee processing lines, Continuous Curd,

Yoghurt, Butter Milk Processing Lines, and Paneer Process Plants.

We engage in the manufacture of all types of SS Milk Process equipment e.g. Milk Silos, Jacketed Tanks, Yoghurt Tanks, CIP Tanks, Ice Cream Aging Vats, Ghee Vats, Cheese Vat Etc.

We supply automated complete dairy plants - (PLC, HMI and SCADA) Monitoring system. We upgrade existing systems from manual to automated plant systems.

We have supplied high quality dairy processing equipment to the leading dairy processor in India - Amul Dairy(GCMMF), Mother Dairy, VRS Foods, Madhusudhan Dairy, Nandini, Milma, Lactalis India, Schreiber Dynamix, Vadilal Industries, Lotte Group Korea, Prabhat Dairy, Hatsun Dairy, Creamline Dairy, Hindustan Unliver, Nestle(Co-Manufacturing Unit), Abott etc.

We also Export Our Equipments to countries Like Kenya, Uganda, Zimbabwe, Sri- Lanka, Bangladesh, Nigeria, Afghanistan, and Canada

- Our product quality is certified by global dairy equipment manufacturing market leaders such as Tetra Pak, SPX, GEA and IDMC and are regularly supplying the Equipments and working for their Projects.

- The company is ISO certified 9001:2015 by TUV Nord and ZE with silver certification from Govt Of India and CRISIL certification.

- We have also been approved by NDDDB India (National Dairy Development Board) and are regularly supplying Equipments and Plants

Dairy Automation Pvt. Ltd.

Hall 1/C 02

Dairy Automation Pvt.Ltd
Processing Simplified!

We offer following solutions

1. Fully Automated Paneer Manufacturing Plant and allied equipment's
2. New computerized integrated dairy plant set up with cutting edge technology.
3. Micro Perforated Moulds for P aneer & Cheese
4. Ultra modern CIP sys tems
5. Automated & Skid Mounted Milk Pasteurizer Modules
6. Modern automation s olutions based on specific section wise needs.

Baumer India Pvt. Ltd.

Hall 1/D 24

Baumer manufactures hygienic and efficient process

sensor at highest product quality specially for dairy, food and beverage industry. Our products portfolio include pressure temperature flow conductivity and level measurement in various dairy applications like cip, silo, liquid level etc. certified by 3A, FDA EHEDGE etc.

Gemak Engineering Solutions

Hall 1/E 47

GEMAK
ENGINEERING SOLUTIONS

We manufacture dairy equipment and offer services which conform to international standards of quality. We shall always strive to achieve customer satisfaction, and be guided in all our operations by the voice of the customer. We have the latest innovative technology to customize the equipment accordingly that endeavor continuous inhouse upgradation of our technology, people, process and productivity as a part of continual

improvement in our effectiveness & efficiency.

Range Of Products

- Bulk Milk Coolers
- Chilling Centre Accessories
- Butter Churn
- Milk Storage Tanks & Silos
- Container based Portable Milk Collection Unit
- Milk Analyzer & Farm Solutions
- Bucket Milking Machine
- Milk Cans

Hindustan Thermostatics

Hall 1/A 36

Hindustan thermostatics was incorporated in 1965 with the manufacturing of milk testing glassware with

pride of having INDIA's first BIS approved milk butyrometer taking a long legacy now HT is a renowned name in the milk procurement solution provider in this whole journey, HT has served almost every federation of INDIAN cooperative dairy sector with their products along with exporting its goods to almost 32 different countries.

Now here in 2021 HT owns the fastest milk analyzer technology with the smartest IoT based milk procurement solution.

Here at HT, we consider the customer's wish is our command, so we provide custom made solutions for milk procurement as per industry demand.

We have a mission to provide every milk producer and milk plant owner count of each drop of milk (दूध का बूंद-बूंद का हिसाब)

JM Filtration Technology

Hall 1/E 21

JM Filtration Technology is one of the leading and fast growing companies in the field of Separation and purification systems in the Dairy industry. We have established

ourselves as a reliable player in the industry through regular and consistent supply of Membrane based systems for various applications in dairy industries, like Whole Milk and Skim Milk Concentration, Whey Demineralization, Lactose separation, Milk & Whey Protein Concentration. Systems are designed and assembled to satisfy the needs of all dairies, either small or big, giving to each one the right customized solutions and thus always guarantee the best cost effectiveness relationship and quick return of investment (ROI).

- Dairy RO: Concentration of TS up to 20% as an alternate to condensing plant
- Dairy NF: De-salting of whey and Skim Milk.
- Dairy UF: Milk Protein and Whey Protein Concentration upto WMC and WPC 80%g
- Dairy MF: Bacteria and spore removal from skim milk and Whey.

M F Engineers

Hall 1/E 56

We introduce ourselves as manufacturer of special purpose gear motors and pillow plates.

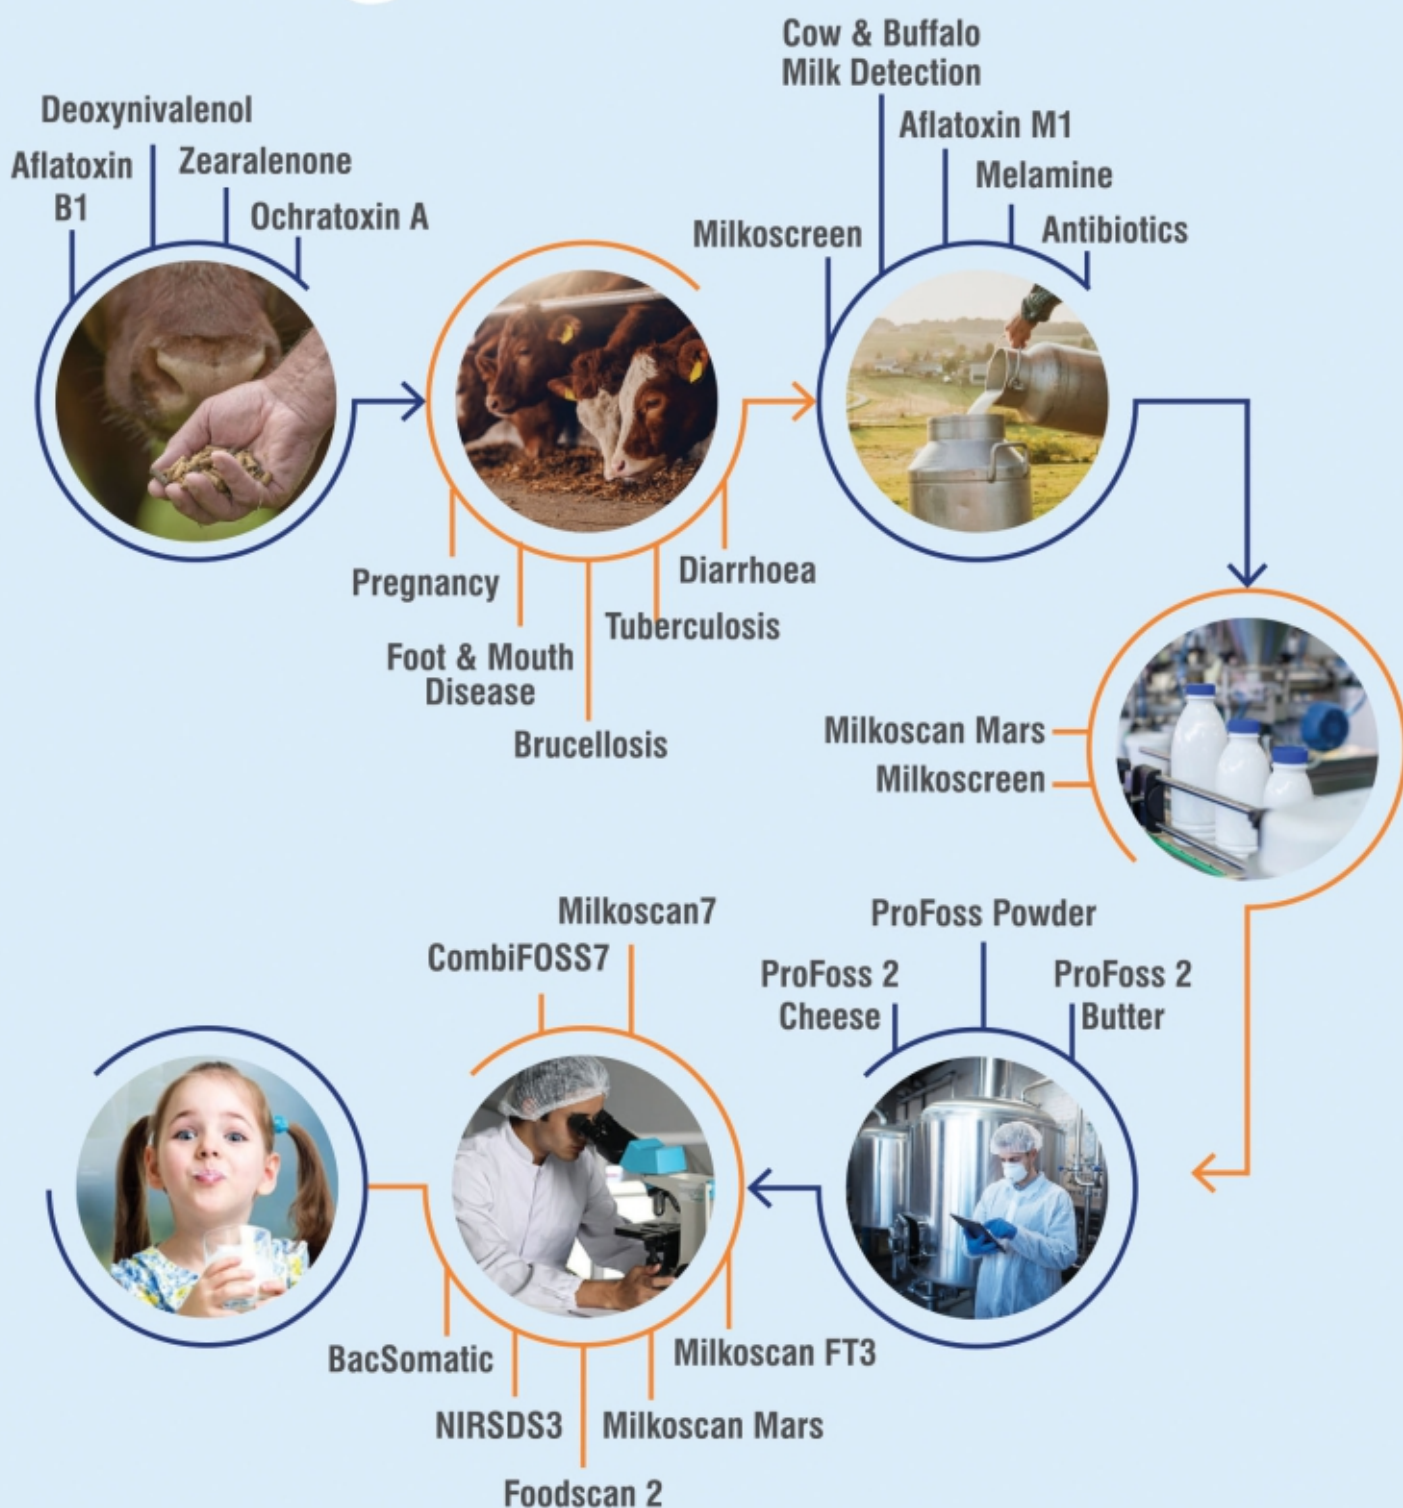

We focus to provide

Quality at best possible cost.

With complete in-house facility of production, quality, research and development. We develop durable and excellent products.

We are associated with a content large customer base across the world.

Analytical Solutions to Monitor and Control Milk Quality and Milk Safety from Farm to Fork

Prochem Turnkey Projects Pvt. Ltd.

Hall 1/C 11

PROCHEM

Prochem is a fast-emerging

business offering Powder Handling solutions for various industries vertical around the globe. ProChem has been one-point solution for powder handling by supplying unloading, conveying, mixing and packaging projects / products for the processing of bulk materials. The optimal combination of innovation, operational safety and service means additional value and success for our customers!

We work on understanding your challenge first and then offer the most optimal solution for it with our machines/applications. At Prochem, we are absolutely committed to deliver exceptional manufacturing solutions and hence have witnessed consistent growth & achieved a long-term success with our customers across the globe.

The growing concerns about food safety in the midst of today's crisis are bound to push for better Powder handling & Packaging solutions in the food processing industry. We, at Prochem takes immense pleasure to invite you to visit our stall Hall 1,C-11 at IIDE,BEC, Mumbai India where we will showcase our best innovative technology & machinery.

Reliable Metals India known for its

innovation in manufacturing technology of Hygienic Stainless Steel Fittings , Hygienic & Ultra high Purity stainless steel tubes under brand name of RMI , Over 12 years of manufacturing experience, The 12,500 m2 integrated manufacturing facility with over 50 committed and dedicated team of employees has a capacity to produce high quality stainless steel tubes , tube fittings , Valves & tank fittings with complete traceability and documentation

Reliable Metals India operates tiered supply chain to ensure that the materials meet customer demands for high quality at competitive prices. We have successfully united a group of experienced experts specializing in all aspects of hygienic stainless-steel manufacturing, including product development and design, production management as well as the quality control system. Our years of experience in stainless steel fitting, valve and other equipment is the key to Customer Satisfaction. Our all the products strictly manufactured according to different sectorial standard (such as ISO, BS 4824, ASME BPE, DIN, IDF, SMS & 3A) under the effort of all scientific research personnel . Our Key Range are ½" to 6" in SS 304, SS 304 L, SS 316, SS 316 L tubes .bend, Tee , Reducer , Tri-clover clamps, tc liner, Butterfly Valve .NRV, Ball Valve , Tank Valve , Disc filter ,man way , Sight Glass , Rotary Spray Ball, etc.

DMN India Pvt. Ltd.

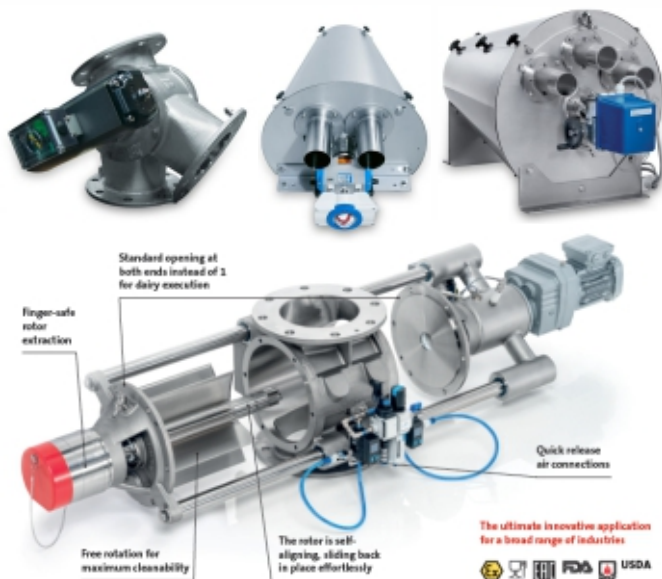

Hall 1/C 45

DMN WESTINGHOUSE We are glad to introduce ourselves as DMN India private limited, 100% subsidiary of DMN-

Westinghouse, Netherlands.

DMN-westinghouse has been designing and manufacturing rotary valves, diverter valves and other related components for the bulk solids handling industry for more than 70 years. We offer tailor-made solutions to the global food, dairy plastics, petrochemicals, chemicals and speciality chemicals, pharmaceuticals, minerals, aquiculture, power and biomass industries.

We are having two production facilities, one in Netherlands exclusive for rotary valves and one in Germany exclusive for diverter valves. Our Indian headquarter is in Chennai and Vadovara to offer 24*7 support for bulk solids.

Everest Instruments Pvt. Ltd.

Hall 1/D 12

India is the world's largest producer and consumer of dairy, and we have been improving the dairy and feed industry's productivity ever since our inception in 1999.

Everest today, offering complete solutions from

farm management, milk collections and monitoring to quality analysis and preservation. We are also offering innovative instruments, software solutions, which ensure that the purity of milk has retained at every step. Most of our products and solutions are Cloud, IoT and BI-enabled, which facilitates transparency and traceability throughout the supply chain at all levels on a real-time basis.

We are an end to end dairy technology solution provider offering advanced digital solutions and devices to simplify the entire journey of milk. Right from the milk collection at villages and bulk centres to more complex data control at dairy plants, we understand every aspect of the milk procurement process and offer solutions to monitor, control and automate it.

Everest extensively research and customize the requirements to match our client's needs across the country. We also provide solutions to simplify the food and beverage testing processes. Our products can spot the nutritional value of food and beverages and identify inconsistencies in quality.

We have a robust presence across all the states in India, with 12 residential branch offices. Have a field force of around 350 technical experts, have already completed more than 100000 installations.

We have embarked on the journey of relentless pursuit to ensure the supply of the best quality of milk testing equipment to the people of India.
